Procedures for Entities Assuming HUD

government receiving HUD assistance to
maintain a written environmental
review record for all projects receiving
HUD funding documenting compliance
with the National Environmental Policy
Act (NEPA), the regulations of the
Council on Environmental Quality,

this procedure are listed in 24 CFR

Emergency Exemption; Issuance of
Emergency Permit To Survey for and
Relocate Jemez Mountain
Salamanders Within the Santa Fe
National Forest, New Mexico

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of issuance of
endangered species emergency permits.

SUMMARY: The final rule to list the Jemez
Mountain salamander (Plethodon
neomexicanus) as endangered throughout its range in New Mexico
published in the Federal Register
on September 10, 2013. The final rule
becomes effective on October 10, 2013.
Without having personnel authorized to
survey for and minimize impacts
through moving individuals out of
harm’s way, the New Mexico Gas
Company’s ongoing pipeline repairs
may be delayed to prevent individual
Jemez Mountain salamanders being
needlessly harmed or killed. We, the
U.S. Fish and Wildlife Service have,
under an Endangered Species Act (ESA)
permit, authorized qualified researchers
to survey for and move Jemez Mountain
salamanders out of harm’s way during
pipeline repairs. These pipeline repairs
are considered essential to human and
environmental health.

ADDRESSES: Documents and other
information concerning the permit are
available for review, subject to the
requirements of the Privacy Act and
Freedom of Information Act. Documents
will be available for public inspection,
by appointment only, during normal
business hours at the U.S. Fish and
Wildlife Service, 500 Gold Ave. SW.,
Room 6034, Albuquerque, NM 87103.

FOR FURTHER INFORMATION CONTACT:
Susan Jacobson, Chief, Endangered
Species Division, P.O. Box 1306,
Albuquerque, NM 87103; (505) 248–
6920.

SUPPLEMENTARY INFORMATION: The New
Mexico Gas Company has identified
eight dented and corroded segments of
gas natural pipeline within the occupied
range of the Jemez Mountain salamander that are in critical condition and require immediate repair. This approximately 17.5-mile-long portion of pipeline lies between the village of Cuba, New Mexico, and the western boundary of the Valles Caldera National Preserve within the Santa Fe National Forest. Emergency repairs are necessary to ensure that natural gas pressure may be restored to levels necessary to supply northern New Mexico with adequate fuel for home heating before any cold weather in early November. These emergency repairs to the pipeline have been analyzed and authorized under an emergency consultation between the Cuba Ranger District, Santa Fe National Forest and the Service’s New Mexico Ecological Services Field Office (Consultation # 02ENNM00–2013–FE–0110). We, the U.S. Fish and Wildlife Service (Service) have, under an Endangered Species Act (16 U.S.C. 1531 et seq.) permit, authorized the following researchers to survey for and move Jemez Mountain salamanders out of harm’s way during pipeline repairs:
