information we need from applicants. Hunters often apply for import permits before leaving on safari and therefore are not in a position to provide information on the specific elephant and population. In addition, hunters are not necessarily in a position to know what portion of their hunting fees will support conservation. This is information that we acquire from the countries of origin, not from permit applicants.

Comment 2: With regard to the cost burden, the International Fund for Animal Welfare and the Natural Resources Defense Council claim that the permit application fee is too small and that it should be increased to fully compensate FWS for costs associated with performing individualized (as opposed to country-wide) enhancement findings. They note that the 2015 market rate for an African elephant hunting package was between $25,000 and $60,000, and add that the $100 permit application fee “imposes trivial additional costs on the importer.”

Response to Comment 2: We are currently reevaluating our permit fees and may, in the future, publish a proposed rule to revise our fee structure.

Comment 3: The Humane Society of the United States and Humane Society International jointly submitted comments in support of the request for extension of approval for information collection through FWS Form 3–200–19 from all importers of African elephant sport-hunted trophies. They stated their belief that it is critically important that this information is collected from applicants for import permits under the Endangered Species Act (ESA; 16 U.S.C. 1531 et seq.), because the information “is essential for FWS to comply with its statutory duties to protect African elephants from threats that jeopardize the species’ continued existence.” They also believe that FWS Form 3–200–19 requests the “bare minimum information needed” from an applicant.

These joint commenters also stated that the current “paltry” applicant fee of $100 for an African elephant sport-hunted trophy import permit is too low and should be increased. They assert that the $100 application fee for import of trophies “cannot possibly reimburse the agency for all of its costs associated with ensuring that applicants are eligible for permits,” and they “urge OMB to formally request that FWS amend this fee structure.”

Response to Comment 3: See our response to Comment 2.

Comment 4: Conservation Force submitted written comments in opposition to the information collection, stating that “it is unnecessary and over burdensome for both the U.S. Fish and Wildlife Service . . . and permit applicants/tourist safari hunters, and it will not provide any useful information.” They contend that it is a “burden without a benefit” and that the burden cannot be reduced unless the permit requirement is removed. Conservation Force also asserts that the burden estimate is inaccurate, because the Service has not considered its current backlog of applications in assessing its ability to process another 300 permits, the additional costs and demands for seizures and law enforcement actions, and the permit renewal fee.

Response to Comment 4: Our newly revised regulations require that we issue an ESA import permit for import of all African elephant sport-hunted trophies. We are seeking authorization to collect the information necessary for us to issue these permits. The burden estimates are developed in accordance with the Paperwork Reduction Act. In estimating the burden to the Service, we consider the time required to process an application, the cost of processing an application, including the salaries of the people doing the work, and the estimated number of applications. In estimating the burden to the applicant, we consider the time it takes to complete an application, including gathering the necessary information, an estimate of the salary of the person completing the form, and the permit fee. Based on our experience, we believe our burden estimates are accurate.

We again invite comments concerning this information collection on: • Whether or not the collection of information is necessary, including whether or not the information will have practical utility; • The accuracy of our estimate of the burden for this collection of information; • Ways to enhance the quality, utility, and clarity of the information to be collected; and • Ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask OMB in your comment to withhold your personal identifying information from public review, we cannot guarantee that it will be done.
Tribes, and the public of our intention to conduct planning on this refuge complex and (2) to obtain suggestions and information on the scope of additional issues to consider during development of the CCP. Through the CCP, the Service intends to evaluate both how NBR is managed and who manages it.

**Background**

**The CCP Process**

The National Wildlife Refuge System Administration Act of 1966, (Administration Act), as amended by the National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd–668ee), requires us to develop a CCP for each national wildlife refuge. The purpose of a CCP is to provide refuge managers with a 15-year strategy for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System (NWRS), consistent with sound principles of fish and wildlife management, conservation, legal mandates, and Service policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Administration Act.

Each unit of the NWRS was established for specific purposes. We use these purposes as the foundation for developing and prioritizing the management goals and objectives for each refuge within the NWRS mission, and to determine how the public can use each refuge. The planning process is a way for us and the public to evaluate management goals and objectives that will ensure the best possible approach to wildlife, plant, and habitat conservation, while providing for wildlife-dependent recreation opportunities that are compatible with each refuge’s establishing purposes and the mission of the NWRS.

We will conduct environmental review pursuant to the provisions of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), by preparing an environmental impact statement (EIS). The Service intends to invite the Confederated Salish and Kootenai Tribes (CSKT) to participate as a cooperating agency as provided by 40 CFR 1508.5.

The Service will prepare a CCP and EIS which will describe management of the NBR over the next 15 years. To facilitate sound planning and environmental assessment, the Service intends to gather information necessary for the preparation of the CCP/EIS and obtain suggestions and information from other agencies and the public on the scope of issues to be addressed in the CCP/EIS. The Service will separately consider CCPs for Pablo, Ninepipe, and Lost Trail National Wildlife Refuges, and the Northwest Montana Lake County Wetland Management District and the waterfowl production areas therein, which are also part of the National Bison Range Complex. The Service will publish a notice of intent to prepare these CCPs at a later date.

**The National Bison Range**

In 1855, the United States entered into the Hell Gate Treaty with the Salish and Kootenai Tribes of Western Montana to establish the Flathead Indian Reservation. Just over 50 years later, on May 23, 1908, Congress enacted legislation that used its power of eminent domain to establish the refuge. The overall mission of the NBR is to maintain a representative herd of bison, under reasonably natural conditions, to ensure the preservation of the species for continued public enjoyment. The NBR is 18,800 acres and supports between 350 and 500 bison. The National Bison Range lies entirely within the boundary of the Flathead Indian Reservation. Members of the CSKT have a cultural, historical, or geographic connection to the land and resources of the Range. There are significant cultural sites located on the Range and the land was formerly owned in trust for the CSKT. The bison at the range today are descendants of bison owned and preserved by CSKT members over a century ago.

**Additional Information**

The draft CCP/EIS for NBR will include detailed information about the planning process, refuge, issues, and desired resource conditions. Based on determination of desired conditions, regardless of which management option is selected, the final CCP/EIS will outline resource management activities and visitor recreational activities. To facilitate sound judgment of environmental impacts, the Service is gathering information necessary for the preparation of a CCP/EIS. Based on public input over the years, the Service believes that the range of management alternatives should include, at a minimum:

- **Alternative A (Current Management):** This alternative represents continuing current management and serves as a baseline for comparing the other alternatives. Under this alternative, we would continue our current habitat and visitor services management activities on existing refuge lands. The Service would continue to be responsible for the overall administration of the NBR and the day-to-day on-site activities. The Service would be responsible for implementation of the NBR CCP.

- **Alternative B (Preferred Management Option):** In this alternative, the Service intends to evaluate the preferred management option of a Congressional transfer of lands comprising of the NBR unit of the National Wildlife Refuge System to the CSKT of the Flathead Reservation, to be held in trust by the Secretary of the Interior for the benefit of the CSKT. In addition to the management of the herd of bison, the CSKT will conserve the natural resources and provide for public visitation and educational opportunities on such lands. Resources would be managed to perpetuate and protect the natural environment and to preserve cultural and historic resources and values. The alternative returns to the tribe control of their traditional lands and cultural resources.

- **Alternative C:** The Service would execute and carry out a draft negotiated Annual Funding Agreement (AFA) per the Tribal Self Governance Act, wherein the CSKT would be responsible for implementing the provisions of the AFA.

**Public Availability of Comments**

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: December 20, 2016.

Noreen Walsh, Regional Director, U.S. Fish and Wildlife Service, Denver, Colorado.
