operators must comply, fall under this OMB control number; (1) Development of an Airport Security Program (ASP) and submission to TSA; (2) submission of ASP amendments to TSA when applicable; (3) collection of data necessary to complete a criminal history records check (CHRC) for those individuals with unescorted access authority to a Security Identification Display Area (SIDA); (4) submission to TSA of identifying information about individuals to whom the airport operator has issued identification media, such as name, address, and country of birth, in order for TSA to conduct a Security Threat Assessment (STA); (5) information collection and recordkeeping requirements associated with airport operator compliance with Security Directives (SDs) issued pursuant to the regulation; and (6) watch list matching of individuals subject to TSA’s regulatory requirements against government watch lists.

This information collection is mandatory for covered airport operators. As part of their security programs, covered airport operators are required to maintain and update, as necessary, records of compliance with the security program provisions set forth in 49 CFR part 1542. This regulation also requires covered airport operators to make their security programs and associated records available for inspection and copying by TSA to verify compliance with transportation security regulations.

As required by 49 CFR part 1542, covered airport operators must ensure that individuals seeking unescorted access authority submit information for and receive a CHRC. Also, covered airport operators must ensure that all individuals to whom it issues an airport identification medium submit information so that TSA can conduct an STA. As part of this process, the individual must provide identifying information, including fingerprints. Additionally, airport operators must maintain these records and make them available to TSA for inspection and copying upon request.

TSA will continue to collect information to determine airport operator compliance with other requirements of 49 CFR part 1542. TSA estimates that there will be approximately 438 airport operator respondents to the information collection requirements described above, with a total annual burden estimate of approximately 1,618,268 hours. This is a difference from the 2016 ICR submission which had an annual burden of 1,657,102. The reduction is due to the number of airport operator respondents varying with the federalization and defederalization of airports.

Christina A. Walsh, TSA Paperwork Reduction Act Officer, Office of Information Technology.
