impressed or embossed on the side of such containers and preceded by the State abbreviation. Containers shall be tagged or labeled to show the name and address of the approved producer or shipper, the name of the State of origin, and the certificate number of the approved producer or shipper.

(End of clause)

21. Section 852.247–70 is revised to read as follows:

As prescribed in 847.305–70, insert the following provision:

Determining Transportation Costs for Evaluation of Offers (Date)

For the purpose of evaluating bids and for no other purpose, the delivered price per unit will be determined by adding the nationwide average transportation charge to the F.o.b. origin bid prices. The nationwide average transportation charge will be determined by applying the following formula: Multiply the guaranteed shipping weight by the freight, parcel post, or express rate, whichever is proper, to each destination shown below and then multiply the resulting transportation charges by the anticipated demand factor shown for each destination. Total the resulting weighted transportation charges for all destinations and divide the total by 20 to give the nationwide average transportation charge.

(End of provision)

22. Section 852.247–71 is added to read as follows:

852.247–71 Delivery Location.

As prescribed in 847.302, insert the following clause substantially as follows:

Delivery Location (Date)

Shipment of deliverable items, other than reports, shall be to: **Contracting Officer** shall insert appropriate identifying data.

(End of clause)

23. Section 852.247–72 is added to read as follows:

852.247–72 Marking Deliverables.

As prescribed in 847.305–10(a), insert a clause substantially the same as:

Marking Deliverables (Date)

(a) The contract number shall be placed on or adjacent to all exterior mailing or shipping labels of deliverable items called for by the contract.

(b) Mark deliverables, except reports, for: **Contracting Officer** shall insert appropriate identifying data.

(End of clause)

24. Section 852.247–73 is added to read as follows:

852.247–73 Packing for Domestic Shipment.

As prescribed in 847.305–10(b), insert the following clause:

Packing for Domestic Shipment (Date)

Material shall be packed for shipment in such a manner that will insure acceptance by common carriers and safe delivery at destination. Containers and closures shall comply with regulations of carriers as applicable to the mode of transportation.

(End of clause)

25. Section 852.247–74 is added to read as follows:

852.247–74 Advance Notice of Shipment.

As prescribed in 847.305–71(a), insert the following clause:

Advance Notice of Shipment (Date)

[Insert number of work days] work days prior to shipping item(s) [Insert items to be shipped], the Contractor shall furnish the anticipated shipment date, bill of lading number (if applicable), and carrier identity to [Insert individual(s) to receive notification] and to the Contracting Officer.

(End of clause)

26. Section 852.247–75 is added to read as follows:

852.247–75 Bills of Lading.

As prescribed in 847.305–71(b), insert the following clause:

Bills of Lading (Date)

The purpose of this clause is to define when a commercial bill of lading or a government bill of lading is to be used when shipments of deliverable items under this contract are F.o.b. origin.

(a) Commercial Bills of Lading. All domestic shipments shall be made via commercial bills of lading (CBLs). The Contractor shall prepay domestic transportation charges. The Government shall reimburse the Contractor for these charges if they are added to the invoice as a separate line item supported by the paid freight receipts. If paid receipts in support of the invoice are not obtainable, a statement as described below must be completed, signed by an authorized company representative, and attached to the invoice.

"I certify that the shipments identified below have been made, transportation charges have been paid by (company name), and paid freight or comparable receipts are not obtainable.

Contract or Order Number: ________

Destination: ________

(ii) Government Bills of Lading.

(1) International (export) and domestic overseas shipments of items deliverable under this contract shall be made by Government bills of lading (GBLs). As used in this clause, "domestic overseas" means non-contiguous United States, i.e., Hawaii, Commonwealth of Puerto Rico, and possessions of the United States.

(2) At least 15 days before shipment, the Contractor shall request in writing GBLs from: [Insert name, title, and mailing address of designated transportation officer or other official delegated responsibility for GBLs]. If time is limited, requests may be by telephone: [Insert appropriate telephone number]. Requests for GBLs shall include the following information:

(i) Item identification/description.

(ii) Origin and destination.

(iii) Individual and total weights.

(iv) Dimensional weight.

(v) Dimensions and total cubic foot.

(vi) Total number of pieces.

(vii) Total dollar value.

(viii) Other pertinent data.

(End of clause)

852.270–2 [Removed].

27. Section 852.270–2 is removed.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Parts 20 and 21

[Miscellaneous]

[FR Doc. 2017–21280 Filed 9–29–17; 8:30 am]

BILLING CODE 4310–57–P

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: In 2005, the U.S. Fish and Wildlife Service (Service or “we”) published a final environmental impact statement on management of resident Canada goose (Branta canadensis) that documented resident Canada goose population levels “that are increasingly coming into conflict with people and...
causing personal and public property damage.” Subsequently, the Service implemented several actions intended to reduce, manage, and control resident Canada goose populations in the continental United States and to reduce related damages; those actions included depredation and control orders that allow destruction of Canada goose nests and eggs by authorized personnel between March 1 and June 30. However, some resident Canada goose currently initiate nests in February, particularly in the southern United States, and it seems likely that in the future nest initiation dates will begin earlier and hatching of eggs will perhaps end later than dates currently experienced. Thus, the Service proposes to amend the depredation and control orders to allow destruction of resident Canada goose nests and eggs at any time of year.

DATES: Comments on this proposed rule must be received by May 25, 2018.

- U.S. mail or hand-delivery: Public Comments Processing, Attn: FWS–HQ–MB–2018–0012; Division of Policy, Performance, and Management Programs; U.S. Fish and Wildlife Service; MS: BPHC; 5275 Leesburg Pike; Falls Church, VA 22041–3803. We will not accept email or faxes. We will post all comments on http://www.regulations.gov, including any personal information you provide. See Public Comments, below, for more information.

FOR FURTHER INFORMATION CONTACT: Paul L. Padding, Atlantic Flyway Representative, Division of Migratory Bird Management, U.S. Fish and Wildlife Service, 11510 American Holly Drive, Laurel, MD 20708; (301) 497–5851 or email paul_padding@fws.gov.

SUPPLEMENTARY INFORMATION:

Authority and Responsibility

Migratory birds are protected under four bilateral migratory bird treaties the United States entered into with Great Britain (for Canada in 1916 as amended in 1999), the United Mexican States (1936 as amended in 1972 and 1999), Japan (1972 as amended in 1974), and the Soviet Union (1978). Regulations allowing the take of migratory birds are authorized by the Migratory Bird Treaty Act (Act; 16 U.S.C. 703–712), which implements the above-mentioned treaties. The Act provides that, subject to and to carry out the purposes of the treaties, the Secretary of the Interior is authorized and directed to determine when, to what extent, and by what means allowing hunting, killing, and other forms of taking of migratory birds, their nests, and eggs is compatible with the conventions. The Act requires the Secretary to implement a determination by adopting regulations permitting and governing those activities.

Canada geese are federally protected by the Act because they are listed as migratory birds in all four treaties. Because Canada geese are covered by all four treaties, regulations must meet the requirements of the most restrictive of the four. For Canada geese, this is the treaty with Canada. All regulations concerning resident Canada geese are compatible with its terms, with particular reference to Articles II, V, and VII.

Each treaty not only permits sport hunting, but permits the take of migratory birds for other reasons, including scientific, educational, propagative, or other specific purposes consistent with the conservation principles of the various Conventions. More specifically, Article VII, Article II (paragraph 3), and Article V of “The Protocol Between the Government of the United States of America and the Government of Canada Amending the 1916 Convention between the United Kingdom and the United States of America for the Protection of Migratory Birds in Canada and the United States” provides specific limitations on allowing the take of migratory birds for reasons other than sport hunting. Article VII authorizes permitting the take, kill, etc., of migratory birds that, under extraordinary conditions, become seriously injurious to agricultural or other interests. Article V relates to the taking of nests and eggs and Article II, paragraph 3, states that, in order to ensure the long-term conservation of migratory birds, migratory bird populations shall be managed in accord with listed conservation principles.

The other treaties are less restrictive. The treaties with both Japan (Article III, paragraph 1, subparagraph (b)) and the Soviet Union (Article II, paragraph 1, subparagraph (d)) provide specific exceptions to migratory bird take prohibitions for the purpose of protecting personnel or property. The treaty with Mexico requires, with regard to migratory game birds, only that there be a “closed season” on hunting and that hunting be limited to 4 months in each year.

Regulations governing the issuance of permits to take, capture, kill, possess, and transport migratory birds are promulgated at title 50, Code of Federal Regulations (CFR), parts 13, 21 and 22, and issued by the Service. The Service annually promulgates regulations governing the take, possession, and transportation of migratory game birds under sport hunting seasons at 50 CFR part 21. Regulations regarding all other take of migratory birds (except for eagles) are published at 50 CFR part 21, and typically are not changed annually.

Background

In November 2005, the U.S. Fish and Wildlife Service (Service or “we”) published a final environmental impact statement on management of resident Canada geese that documented resident Canada goose population levels “that are increasingly coming into conflict with people and causing personal and public property damage.” On August 10, 2006, we published in the Federal Register (71 FR 45964) a final rule establishing regulations at 50 CFR parts 20 and 21 authorizing State wildlife agencies, private landowners, and airports to conduct (or allow) indirect and/or direct population control management activities to reduce, manage, and control resident Canada goose populations in the continental United States and to reduce related damages. Those activities include depredation and control orders that allow destruction of resident Canada goose nests and eggs by authorized personnel between March 1 and June 30, because that timeframe encompassed the period when resident Canada geese typically nested.

In recent years, some resident Canada geese have initiated nests in February, particularly in the southern United States, and it seems likely that in the future nest initiation dates will begin earlier and hatching of eggs will perhaps end later than dates currently experienced. This proposed rule would amend the special permit and depredation and control orders to allow destruction of resident Canada goose nests and eggs at any time of year, thereby affording State agencies, private landowners, and airports greater flexibility to use these methods of controlling local abundances of resident Canada geese.

Definition of Resident Canada Geese

The current definition of resident Canada geese contained in 50 CFR 20.11 and 21.3 states that “Canada geese that
nest within the lower 48 States and the District of Columbia in the months of March, April, May, or June, or reside within the lower 48 States and the District of Columbia in the months of April, May, June, July, or August” are considered resident Canada geese. We are proposing to amend this definition by deleting the phrase, “in the months of March, April, May, or June.” (following the word “Columbia”) to clarify that any Canada geese that nest within lower 48 States and the District of Columbia are resident Canada geese.

**Removal of Date Restrictions on Nest and Egg Destruction**

In title 50 of the CFR, destruction of resident Canada goose nests and eggs is currently authorized under special Canada goose permits (§ 21.26), a control order for airports and military airfields (§ 21.49), a depredation order specific to nests and eggs (§ 21.50), a depredation order for agricultural facilities (§ 21.51), and a public health control order (§ 21.52). Each of these regulations prescribes the dates during which nests and eggs of resident Canada goose may be destroyed. We propose to remove those date restrictions and allow destruction of Canada goose nests and eggs, as otherwise authorized under these regulations, at any time of year.

Our proposal is based on several factors. First, nest and egg destruction has been an effective tool in reducing local conflicts and damages caused by resident Canada goose. Second, resident Canada geese are identified as such based on where, not when, they nest. Lastly, some Canada geese are already nesting in February in southern States, and it seems likely that nest initiation dates will also advance into February in mid-latitude and perhaps northern States in the future, and hatching of nests may occur later than June 30.

**Eliminating Date Restrictions for Lethal Control Activities in California, Oregon, and Washington**

On June 17, 1999, we published in the Federal Register (64 FR 32766) a final rule establishing 50 CFR 21.26, the special Canada goose permit. Special Canada goose permits may be issued to State wildlife agencies authorizing them to conduct certain resident Canada goose management and control activities that are normally prohibited. At that time, we indicated that States may conduct those control activities between March 11 and August 31, but that they should make a concerted effort to limit the take of adult birds to June, July, and August in order to minimize the potential impact on migrant populations. We imposed a date restriction of May 1 through August 31 in some areas in California, Oregon, and Washington inhabited by the threatened Aleutian Canada goose (*Branta canadensis leucopareia*) pursuant to the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 et seq.). The Aleutian Canada goose was listed as endangered in 1967 (32 FR 4001; March 11, 1967) and reclassified to threatened status in 1990 (55 FR 51106; December 12, 1990). Aleutian geese occur in a small numbers within these States, primarily San Joaquin Valley and Sacramento River Delta areas in central California, Humboldt Bay and Crescent City areas on the northern California coast, and Langlois and Pacific City areas on the Oregon coast. We indicated that if this subspecies is delisted, we would review this provision.

On March 20, 2001, we published in the Federal Register (66 FR 15643) a final rule to remove the Aleutian Canada goose from the Federal List of Endangered and Threatened Wildlife, due to recovery. Abundance of this population increased from 790 birds in 1975, to an estimated 156,030 in the winter of 2016. The Pacific Flyway Council’s objective for this population is 60,000 geese. Currently, there is no special habitat or other threat that may reduce this population back to levels that may need protection under the ESA. Considering the current status of the Aleutian Canada goose, we propose to remove the May 1 restriction so that management and control activities may be conducted during the same period (March 11 through August 31) throughout all States.

**Environmental Assessment**

We prepared an environmental assessment (EA) that analyzed two alternative courses of action to address these earlier nesting and later hatching dates and decrease local abundances of Canada geese that nest in the lower 48 States and the District of Columbia:

1. Maintain the current date restrictions specified in regulations at 50 CFR 21.26, 21.49, 21.50, 21.51, and 21.52 on destruction of resident Canada goose nests and eggs, and no change in the definition of resident Canada geese at 50 CFR 20.11 and 21.3 (No action); and

We note that the proposed amendment to § 21.26 in regard to accounting for the current status of the Aleutian Canada goose was not addressed in the EA, but is a categorically excluded action (43 CFR 46.210) addressed in an environmental action statement (EAS). The EAS can be found on our website at http://www.fws.gov/birds or at http://www.regulations.gov at Docket No. FWS–HQ–MB–2018–0012.

**Public Comments**

You may submit your comments and supporting materials by one of the methods listed in ADDRESSES. We will not consider comments sent by email or fax, or written comments sent to an address other than the one listed in ADDRESSES. Comments and materials we receive, as well as supporting documentation we used in preparing this proposed rule, are available for public inspection at http://www.regulations.gov.

We will post your entire comment—including your personal identifying information—on http://www.regulations.gov. You may request at the top of your document that we withhold personal information such as your street address, phone number, or email address from public review; however, we cannot guarantee that we will be able to do so.

**Required Determinations**

Regulatory Planning and Review (Executive Orders 12866 and 13563)

Executive Order (E.O.) 12866 provides that the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget (OMB) will review all significant rules. OIRA has determined that this rule is not significant.

Executive Order 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the nation’s regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. The executive order directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open
exchange of ideas. We have developed this proposed rule in a manner consistent with these requirements.

Regulatory Flexibility Act

Under the Regulatory Flexibility Act (5 U.S.C. 601 et seq., as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996 (Pub. L. 104–121)), whenever an agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effects of the rule on small businesses, small organizations, and small government jurisdictions. However, no regulatory flexibility analysis is required if the head of an agency certifies the rule would not have a significant economic impact on a substantial number of small entities.

SBREFA amended the Regulatory Flexibility Act to require Federal agencies to provide a statement of the factual basis for certifying that a rule would not have a significant economic impact on a substantial number of small entities. Thus, for a regulatory flexibility analysis to be required, impacts must exceed a threshold for “significant impact” and a threshold for a “substantial number of small entities.” See 5 U.S.C. 605(b).

The economic impacts of this proposed rule would primarily affect State and local governments and the U.S. Department of Agriculture’s Wildlife Services because of the structure of wildlife damage management. Data are not available to estimate the exact number of local governments that would be affected, but it is unlikely to be a substantial number nationally. Therefore, we certify that, if adopted, this rule would not have a significant economic impact on a substantial number of small entities.

Small Business Regulatory Enforcement Fairness Act

This proposed rule is not a major rule under SBREFA (5 U.S.C. 804(2)). It would not have a significant impact on a substantial number of small entities. This rule would not have an annual effect on the economy of $100 million or more. This rule would not cause a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions.

Finally, this rule would not have significant adverse effects on competition, employment, investment, productivity, innovation, or the abilities of U.S.-based enterprises to compete with foreign-based enterprises.

Executive Order 13771—Reducing Regulation and Controlling Regulatory Costs

This proposed rule is expected to be an Executive Order (E.O.) 13771 (82 FR 9339, February 3, 2017) deregulatory action because it would relieve a restriction in 50 CFR parts 20 and 21.

Unfunded Mandates Reform Act

In accordance with the Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.), we have determined the following:

a. This proposed rule would not “significantly or uniquely” affect small government activities. A small government agency plan is not required.

b. This proposed rule would not produce a Federal mandate on local or State government or private entities. Therefore, this action is not a “significant regulatory action” under the Unfunded Mandates Reform Act.

Takings

In accordance with E.O. 12630, this proposed rule does not contain a provision for taking of private property, and would not have significant takings implications. A takings implication assessment is not required.

Federalism

This proposed rule would not interfere with the States’ abilities to manage themselves or their funds. We do not expect any economic impacts to result from this regulations change. This rule would not have sufficient Federalism effects to warrant preparation of a federalism summary impact statement under E.O. 13132.

Civil Justice Reform

In accordance with E.O. 12988, the Office of the Solicitor has determined that the proposed rule will not unduly burden the judicial system and meets the requirements of sections 3(a) and 3(b)(2) of the Order.

Paperwork Reduction Act

This proposed rule does not contain new collections of information that require approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). OMB has approved the information collection requirements associated with the control and management of resident Canada goose at 50 CFR part 20 and 50 CFR part 21, and assigned OMB Control Number 1018–0133 (expires December 31, 2018).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

National Environmental Policy Act

We have analyzed this proposed rule in accordance with the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 et seq.) and U.S. Department of the Interior regulations at 43 CFR part 46. We have completed an environmental assessment of the proposed amendment of the depredation and control orders that would allow destruction of resident Canada goose nests and eggs at any time of year; that environmental assessment is included in the docket for this proposed rule. We conclude that our proposed action would have the impacts listed below under Environmental Consequences of the Action. The proposed amendment to § 21.26 in regard to accounting for the current status of the Aleutian Canada goose was not addressed in the EA, but is a NEPA categorically excluded action (43 CFR 46.210) addressed in an environmental action statement (EAS), which is also included in the docket for this proposed rule. The docket for this proposed rule is available at http://www.regulations.gov (Docket No. FWS–HQ–MB–2018–0012).

Environmental Consequences of the Action

Migrant Canada geese do not nest in the lower 48 States or the District of Columbia; thus, this proposed action (amendments related only to depredation and control orders) is not expected to have any significant impacts on migrant Canada geese. All resident Canada goose population abundances are well above population objectives. Assuming that the number of resident Canada goose that initiate nests in January or February does not exceed the current number that initiate nests in March, we expect that this proposed action would result in destruction of a maximum of 2,749 additional nests in January and February. We expect it is more likely that the proposed action would shift some portion of the current resident Canada goose nest and egg destruction activities occurring in March to either January or February. All populations of resident Canada goose are expected to remain at or above population objective levels. Socioeconomic. This proposed action is expected to have positive impacts on the socioeconomic environment in localized urban and suburban areas where resident Canada geese are subjected to continued annual nest and egg destruction actions that gradually reduce goose numbers and
resulting conflicts. It is also expected to reduce crop depredation at some localized agricultural sites where nest destruction can encourage geese to leave the site.

**Endangered and threatened species.** The proposed rule will not affect endangered or threatened species or critical habitats.

**Compliance With Endangered Species Act Requirements**

Section 7 of the Endangered Species Act of 1973, as amended (ESA: 16 U.S.C. 1531 et seq.), requires that “The Secretary [of the Interior] shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act” (16 U.S.C. 1536(a)(1)). It further states that “[e]ach Federal agency shall, in consultation with and with the assistance of the Secretary, insure that any action authorized, funded, or carried out by such agency * * * is not likely to jeopardize the continued existence of any endangered species or threatened species or result in the destruction or adverse modification of [critical] habitat” (16 U.S.C. 1536(a)(2)). The proposed rule would not affect endangered or threatened species or critical habitats.

**Government-to-Government Relationship With Tribes**

In accordance with the President’s memorandum of April 29, 1994, “Government-to-Government Relations with Native American Tribal Governments” (59 FR 22951), E.O. 13175, and 512 DM 2, we have evaluated potential effects on federally recognized Indian tribes and have determined that there are no potential effects. This proposed rule would not interfere with the tribes’ abilities to manage themselves or their funds or to regulate migratory bird activities on tribal lands.

**Clarity of This Proposed Rule**

We are required by Executive Orders 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

- (a) Be logically organized;
- (b) Use the active voice to address readers directly;
- (c) Use clear language rather than jargon;
- (d) Be divided into short sections and sentences; and
- (e) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in ADDRESSES. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

**Energy Supply, Distribution, or Use (E.O. 13211)**

E.O. 13211 requires agencies to prepare Statements of Energy Effects when undertaking certain actions. This proposed rule is not a significant regulatory action under E.O. 13211, and would not significantly affect energy supplies, distribution, or use. Therefore, this action is not a significant energy action. No Statement of Energy Effects is required.

**List of Subjects in 50 CFR Parts 20 and 21**

Exports, Hunting, Imports, Reporting and recordkeeping requirements, Transportation, Wildlife.

**Proposed Regulation Promulgation**

For the reasons stated in the preamble, we hereby propose to amend parts 20 and 21, of subchapter B, chapter I, title 50 of the Code of Federal Regulations, as set forth below:

**PART 20—MIGRATORY BIRD HUNTING**

1. The authority citation for part 20 continues to read as follows:

   **Authority:** 16 U.S.C. 703 et seq. and 16 U.S.C. 742a–j.

2. Amend § 20.11 by revising paragraph (n) to read as follows:

   **§ 20.11 What terms do I need to understand?**

   (n) Resident Canada goose means Canada goose that nest within the lower 48 States and the District of Columbia or that reside within the lower 48 States and the District of Columbia in the months of April, May, June, July, or August.

**PART 21—MIGRATORY BIRD PERMITS**

3. The authority citation for part 21 is revised to read as follows:

   **Authority:** 16 U.S.C. 703–712.

4. Amend § 21.3 by revising the definition for “Resident Canada goose” to read as follows:

   **§ 21.3 Definitions.**

   (4) Authorized agricultural producers and their employees and agents may...
conduct management and control activities, involving the take of resident Canada geese, under this section between May 1 and August 31. The destruction of resident Canada goose nests and eggs may take place at any time of year.

9. Amend §21.52 by revising paragraph (e)(3) to read as follows:

§21.52 Public health control order for resident Canada geese.

(e) * * * *

(3) Authorized State and Tribal wildlife agencies and their employees and agents may conduct management and control activities, involving the take of resident Canada geese, under this section between April 1 and August 31. The destruction of resident Canada goose nests and eggs may take place at any time of year.

Susan Combs,
Senior Advisor to the Secretary, Exercising the Authority of the Assistant Secretary for Fish and Wildlife and Parks.
