RIN 1018-BC67

General Provisions; Revised List of Migratory Birds

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose to revise the List of Migratory Birds protected by the Migratory Bird Treaty Act (MBTA) by both adding and removing species. Reasons for the changes to the list include adding species based on new taxonomy and new evidence of natural occurrence in the United States or U.S. territories, removing species no longer known to occur within the United States or U.S. territories, and changing names to conform to accepted use. The net increase of 59 species (66 added and 7 removed) would bring the total number of species protected by the MBTA to 1,085. We regulate the taking, possession, transportation, sale, purchase, barter, exportation, and importation of migratory birds. An accurate and up-to-date list of species protected by the MBTA is essential for public notification and regulatory purposes.

DATES: We will accept comments received or postmarked on or before January 28, 2019. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES**, below) must be received by 11:59 p.m. Eastern Time on the closing date.

ADDRESSES: You may submit comments by one of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: <http://www.regulations.gov>. In the Search box, enter FWS-HQ-MB-2018-0047, which is the docket number for this rulemaking. Then, click on the Search button. On the resulting page, in the Search panel on the left side of the screen, under the Document Type heading, click on the Proposed Rule box to locate this document. You may submit a comment by clicking on "Comment Now!"

(2) *By hard copy:* Submit by U.S. mail or hand-delivery to: Public Comments Processing, Attn: FWS-HQ-MB-2018-0047, U.S. Fish and Wildlife Service,

MS: BPHC, 5275 Leesburg Pike, Falls Church, VA 22041-3803.

We request that you send comments only by the methods described above. We will post all comments on <http://www.regulations.gov>. This generally means that we will post any personal information you provide us (see Public Comments, below, for more information).

FOR FURTHER INFORMATION CONTACT: Eric L. Kershner, Chief of the Branch of Conservation, Permits, and Regulations; Division of Migratory Bird Management; U.S. Fish and Wildlife Service; MS: MB; 5275 Leesburg Pike, Falls Church, VA 22041-3803; (703) 358-2376.

SUPPLEMENTARY INFORMATION:**What statutory authority does the service have for this rulemaking?**

We have statutory authority and responsibility for enforcing the MBTA (16 U.S.C. 703-712), the Fish and Wildlife Improvement Act of 1978 (16 U.S.C. 7421), and the Fish and Wildlife Act of 1956 (16 U.S.C. 742a-j). The MBTA implements Conventions between the United States and four neighboring countries for the protection of migratory birds, as follows:

(1) *Canada:* Convention between the United States and Great Britain [on behalf of Canada] for the Protection of Migratory Birds, August 16, 1916, 39 Stat. 1702 (T.S. No. 628), as amended by Protocol between the Government of the United States and the Government of Canada Amending the 1916 Convention between the United Kingdom and the United States of America for the Protection of Migratory Birds, Sen. Treaty Doc. 104-28 (December 14, 1995);

(2) *Mexico:* Convention between the United States and Mexico for the Protection of Migratory Birds and Game Mammals, February 7, 1936, 50 Stat. 1311 (T.S. No. 912), as amended by Protocol with Mexico amending Convention for Protection of Migratory Birds and Game Mammals, Sen. Treaty Doc. 105-26 (May 5, 1997);

(3) *Japan:* Convention between the Government of the United States of America and the Government of Japan for the Protection of Migratory Birds and Birds in Danger of Extinction, and Their Environment, March 4, 1972, 25 U.S.T. 3329 (T.I.A.S. No. 7990); and

(4) *Russia:* Convention between the United States of America and the Union of Soviet Socialist Republics Concerning the Conservation of Migratory Birds and Their Environment (Russia), November 19, 1976, 29 U.S.T. 4647 (T.I.A.S. No. 9073).

What is the purpose of this rulemaking?

Our purpose is to inform the public of the species protected by the MBTA and its implementing regulations. These regulations are found in Title 50, Code of Federal Regulations (CFR), parts 10, 20, and 21. We regulate the taking, possession, transportation, sale, purchase, barter, exportation, and importation of migratory birds. An accurate and up-to-date list of species protected by the MBTA is essential for notifying the public of regulatory protections.

Why is the amendment of the list of migratory birds necessary?

The amendments we are proposing are needed to:

- (1) Add 17 species that qualify for protection under the MBTA;
- (2) Correct the spelling of 3 species names on the alphabetized list;
- (3) Correct the spelling of 3 species names on the taxonomic list;
- (4) Add 22 species based on new distributional records documenting their natural occurrence in the United States or U.S. territories since 2010;
- (5) Add one species moved from a family that was not protected to a family now protected under the MBTA as a result of taxonomic changes;
- (6) Add 26 species newly recognized as a result of recent taxonomic changes;
- (7) Remove 7 species not known to occur within the boundaries of the United States or U.S. territories as a result of recent taxonomic changes;
- (8) Change the common (English) names of 40 species to conform to accepted use; and
- (9) Change the scientific names of 114 species to conform to accepted use.

The List of Migratory Birds (50 CFR 10.13) was last revised on November 1, 2013 (78 FR 65844). The amendments proposed in this rule were necessitated by eight published supplements to the 7th (1998) edition of the American Ornithologists' Union (AOU, now recognized as American Ornithological Society (AOS)) Check-list of North American Birds (AOU 2011, AOU 2012, AOU 2013, AOU 2014, AOU 2015, AOU 2016, AOS 2017, and AOS 2018) and the 2017 publication of the Clements Checklist of Birds of the World (Clements et al. 2017).

What scientific authorities are used to amend the list of migratory birds?

Although bird names (common and scientific) are relatively stable, staying current with standardized use is necessary to avoid confusion in communications. In making our determinations, we primarily relied on

the AOS's Checklist of North American birds (AOU 1998), as amended annually (AOU 1999 through 2016, AOS 2017, AOS 2018), on matters of taxonomy, nomenclature, and the sequence of species and other higher taxonomic categories (Orders, Families, Subfamilies) for species that occur in North America. The AOS Checklist contains all bird species that have occurred in North America from the Arctic through Panama, including the West Indies and the Hawaiian Islands, and includes distributional information for each species, which specifies whether the species is known to occur in the United States. For the species that occur outside the geographic area covered by the AOS Checklist, we relied on Clements et al. (2017) and peer-reviewed literature. Although we primarily rely on the above sources, when informed taxonomic opinion is inconsistent or controversial, we evaluate available published and unpublished information and come to our own conclusion regarding the validity of taxa.

What criteria are used to identify individual species protected by the MBTA?

A species qualifies for protection under the MBTA by meeting one or more of the following criteria:

(1) It occurs in the United States or U.S. territories as the result of natural biological or ecological processes and is currently, or was previously listed as, a species or part of a family protected by one of the four international treaties or their amendments. Any species that occurs in the United States or U.S. territories solely as a result of intentional or unintentional human-assisted introduction does not qualify for the MBTA list, regardless of whether the family the species belongs to is listed in any of the treaties, unless:

- It was native to the United States or its territories and extant in 1918;
- It was extirpated after 1918 throughout its range in the United States and its territories; and
- After such extirpation, it was reintroduced in the United States or its territories as part of a program carried out by a Federal agency.

(2) Revised taxonomy results in it being newly split from a species that was previously on the list, and the new species occurs in the United States or U.S. territories as the result of natural biological or ecological processes. If a newly recognized native species is considered extinct (following the classification of the American Ornithological Society (AOS) or, for species not covered by the AOS, the

Clements checklist or peer-reviewed literature), that species will still be included if either of the following criteria apply:

- The species resembles extant species included in the list that may be affected by trade if the species is not included; or

- Not including the species may create difficulties implementing the MBTA and its underlying Conventions.

(3) New evidence exists for its natural occurrence in the United States or U.S. territories resulting from new or natural distributional changes and the species occurs in a protected family. Records must be documented, accepted, and published by the AOS committee. For the U.S. Pacific territories that fall outside the geographic scope of the AOS and for which there is no identified ornithological authority, new evidence of a species' natural occurrence will be based on the Clements checklist and then published peer-reviewed literature, in that order.

In accordance with the Migratory Bird Treaty Reform Act of 2004 (MBTRA) (Pub. L. 108-447, 118 Stat. 2809, 3071-72), we only include migratory bird species that are native to the United States or U.S. territories. A native migratory bird species is one that is present as a result of natural biological or ecological processes. The list at 50 CFR 10.13 does not include nonnative species that occur in the United States or U.S. territories solely as a result of intentional or unintentional human-assisted introduction(s). Elsewhere in today's **Federal Register**, we publish a notice of availability of the draft revised list of nonnative bird species that are not protected under the MBTA.

How would the proposed changes affect the list of migratory birds?

Several taxonomic changes were made at the Order and Family level by the AOS since our 2013 publication of the list (78 FR 65844; November 1, 2013). These changes affect the inclusion and taxonomic order of species on this list. Specifically, the Order Cathartiformes (New World vultures) was split from the Accipitriformes (diurnal birds of prey). Cathartiformes now includes the Family Cathartidae (vultures and California condor). At the Family level, the Oceanitidae (southern storm-petrels) was split from the Hydrobatidae (northern storm-petrels), the Tityridae (becards and tityras) was split from the Tyrannidae (tyrant flycatchers), the Passerellidae (towhees, sparrows, and juncos) was split from the Emberizidae (buntings), the Megaluridae (*Locustella* warblers) was renamed to Locustellidae.

The Ptilogonatidae (silky-flycatchers) was renamed to the Ptiliogonatidae. The Nesospingidae (Puerto Rican tanager) and the Spindalidae (*Spindalis* genus) were split from the Thraupidae (tanagers). The yellow-breasted chat was split from the Parulidae (wood-warblers) and placed into Icteridae (chats). Within the Scolopacidae (sandpipers, phalaropes, and allies), new Subfamilies were created: The curlews were moved to Numeniinae; the godwits to Limosinae; and small sandpipers to Arenariinae and larger sandpipers to Tringinae, including phalaropes whose previous Subfamily Phalaropodinae was removed. Within the Accipitridae (hawks, eagles, and kites), new Subfamilies were created: The white-tailed kite was moved to Elaninae, hook-billed and swallow-tailed kite were moved to Gypaetinae, and all other members of the family were moved to Accipitrinae. Within the Icteridae (blackbirds), new Subfamilies were created: Yellow-headed blackbird was moved to Xanthocephalinae; bobolink was moved to Dolichonychinae; meadowlarks were moved to Sturnellinae; orioles were moved to Icterinae; and blackbirds, cowbirds, and grackles were moved to Agelaiinae. In the Falconidae (caracaras and falcons), collared forest-falcon was moved into the new Subfamily Herpetotherinae, and the Subfamily Caracarinae was removed, with crested caracara moved to the Subfamily Falconinae. In the Fringillidae (finches and allies), the Hawaiian fringillids were moved from the Subfamily Drepanidinae to Carduelinae. The Old World flycatchers in the Turdidae (thrushes) were moved to the Muscicapidae (Old World flycatchers). Bananaquit was moved from the Coerebidae (a family not protected by MBTA) to the Thraupidae (tanagers and allies), which is a family protected by the MBTA. All other tanagers were also moved from the Emberizidae (sparrows) to the Thraupidae. Within Thraupidae, the seedeaters were moved into the Subfamily Sporophilinae, and bananaquit, grassquits, and bullfinches were moved into the Subfamily Coerebinae.

All species previously receiving protection under the MBTA that have been moved to newly created Families continue to be protected under the MBTA.

The proposed amendments (66 additions, 7 removals, and 154 name changes) would affect a total of 204 species and would result in a net addition of 59 species to the List of Migratory Birds, increasing the number of species on the list from 1,026 to

1,085. Of the 66 species that we would add to the list, 26 were previously covered under the MBTA as members of the same species (conspecific) of listed species. These proposed amendments can be logically arranged in the following nine categories:

(1) Add 17 species that qualify for protection by the MBTA but have not been added previously. The addition of these species is the result of either accepting AOS taxonomic updates that were previously excluded or determinations of documented natural occurrence in the United States or U.S. territories. The species and relevant publication(s) are:

Pink-footed Goose, *Anser brachyrhynchus* (AOU 1983);
 Cackling Goose, *Branta hutchinsii* (AOU 2003);
 European Turtle-Dove, *Streptopelia turtur* (AOU 2007);
 Long-tailed Koel, *Urodynamis taitensis* (Wiles 2005);
 White-tailed Nightjar, *Hydrosalis cayennensis* (AOU 1983);
 Vervain Hummingbird, *Mellisuga minima* (AOU 1983);
 Kentish Plover, *Charadrius alexandrinus* (Enbring and Owen 1981);
 Common Redshank, *Tringa totanus* (Wiles 2005);
 Nazca Booby, *Sula granti* (AOU 2000);
 Abbott's Booby, *Papasula abbotti* (Pratt et al. 2009);
 Rufous Night-Heron, *Nycticorax caledonicus* (Glass et al. 1990);
 Gray-faced Buzzard, *Butastur indicus* (Stinson et al. 1997);
 Eastern Marsh-Harrier, *Circus spilonotus* (Wiles et al. 2000);
 Amur Falcon, *Falco amurensis* (Stinson et al. 1991);
 Eurasian Jackdaw, *Corvus monedula* (AOU 1998);
 Redwing, *Turdus iliacus* (AOU 1983);
 Common Kingfisher, *Alcedo atthis* (Wiles et al. 1993).

(2) Correct the spelling of three common or scientific names on the alphabetized list:

Eared Quetzal, *Euptilotis neoxenus*, becomes Eared Quetzal
 Red-footed falcon, *Flaco vespertinus*, becomes *Falco vespertinus*
 Piratic Flycatcher, *Legatus leucophalus* becomes *Legatus leucophaius*

(3) Correct the spelling of three common or scientific names on the taxonomic list:

Eared Quetzal, *Euptilotis neoxenus*, becomes Eared Quetzal
 White-crested Elaenia, *Elaenia albiceps* becomes White-crested Elaenia
 Piratic Flycatcher, *Legatus leucophalus* becomes *Legatus leucophaius*

(4) Add 22 species based on review and acceptance by the AOS (since 2010) or by other appropriate ornithological authorities of new distributional records

documenting their occurrence in the United States or U.S. territories. These species belong to families covered by at least one of the four international conventions, and all are considered to be of accidental or casual occurrence. For each species, we list the State in which it has been recorded plus the relevant publication:

Common Scoter, *Melanitta nigra*—California and Oregon (AOS 2017);
 Amethyst-throated Hummingbird, *Lampornis amethystinus*—Texas (AOS 2018);
 Rufous-necked Wood-Rail, *Aramides axillaris*—New Mexico (AOU 2016);
 Solitary Snipe, *Gallinago solitaria*—Alaska (AOU 2011);
 Chatham Albatross, *Thalassarche eremita*—California (AOS 2017);
 Providence Petrel, *Pterodroma solandri*—Alaska (AOU 2013);
 Fea's Petrel, *Pterodroma feae*—North Carolina, Georgia, Virginia (AOU 2013);
 Zino's Petrel, *Pterodroma madeira*—North Carolina, (AOU 2015);
 White-chinned Petrel, *Procellaria aequinoctialis*—Texas, California, Maine (AOU 2011);
 Bryan's Shearwater, *Puffinus bryani*—Hawaii (AOU 2012);
 Bare-throated Tiger-Heron, *Tigrisoma mexicanum*—Texas (AOU 2011);
 Double-toothed Kite, *Harpagus bidentatus*—Texas (AOU 2013);
 Amazon Kingfisher, *Chloroceryle amazona*—Texas (AOU 2011);
 Gray-collared Becard, *Pachyrhamphus major*—Arizona (AOU 2011);
 Pine Flycatcher, *Empidonax affinis*—Arizona (AOS 2018);
 Cuban Vireo, *Vireo gundlachii*—Florida (AOS 2018);
 Common Chiffchaff, *Phylloscopus collybita*—Alaska (AOU 2014);
 Blyth's Reed Warbler, *Acrocephalus dumetorum*—Alaska (AOU 2017);
 Common Redstart, *Phoenicurus phoenicurus*—Alaska (AOU 2015);
 Brown-backed Solitaire, *Myadestes occidentalis*—Arizona (AOU 2011);
 Asian Rosy-Finch, *Leucosticte arctoa*—Alaska (AOU 2013);
 Red-legged Honeycreeper, *Cyanerpes cyaneus*—Texas (AOS 2017).

(5) Add one species because of recent taxonomic changes transferring a species in a Family formerly not protected by the MBTA (Coerebidae) into a Family protected under the MBTA (Thraupidae). We reference the AOU publication supporting the change: Bananaquit, *Coereba flaveola*, (AOU 2015).

(6) Add 26 species because of recent taxonomic changes in which taxa formerly treated as conspecific have been determined to be distinct species. Given that each of these species was formerly treated as conspecific with a listed species, these additions would not change the protective status of any of these taxa, only the names by which

they are known. In each case, we reference the AOS or relevant publication supporting the change:

Ridgway's Rail, *Rallus obsoletus*—formerly considered conspecific with Clapper Rail, *Rallus longirostris* (AOU 2014);
 Common Gallinule, *Gallinula galeata*—formerly considered conspecific with Common Moorhen, *Gallinula chloropus* (AOU 2011);
 Scripps's Murrelet, *Synthliboramphus scrippsii*—formerly considered conspecific with Xantus's Murrelet, *Synthliboramphus hypoleucus* (AOU 2012);
 Salvin's Albatross, *Thalassarche salvini*—formerly considered conspecific with Shy Albatross, *Thalassarche cauta* (AOU 2014);
 Trindade Petrel, *Pterodroma arminjoniana*—formerly considered conspecific with Herald Petrel, *Pterodroma heraldica* (AOU 2015);
 Newell's Shearwater, *Puffinus newelli*—formerly considered conspecific with Townsend's Shearwater, *Puffinus auricularis* (AOU 2015);
 Barolo Shearwater, *Puffinus baroli*—formerly considered conspecific with Little Shearwater, *Puffinus assimilis* (AOU 2013);
 Townsend's Storm-Petrel, *Oceanodroma socorroensis*—formerly considered conspecific with Leach's Storm-Petrel, *Oceanodroma leucorhoa* (AOU 2016);
 Northern Boobook, *Ninox japonica*—formerly considered conspecific with Brown Hawk-Owl, *Ninox scutulata* (AOU 2014);
 Pacific Kingfisher, *Todiramphus sacer*—formerly considered conspecific with Collared Kingfisher, *Todiramphus chloris* (Clements et al. 2015);
 Mariana Kingfisher, *Todiramphus albicilla*—formerly considered conspecific with Collared Kingfisher, *Todiramphus chloris* (Clements et al. 2015);
 Woodhouse's Scrub-Jay, *Aphelocoma woodhouseii*—formerly considered conspecific with Western Scrub-Jay, *Aphelocoma californica* (AOU 2016);
 Kamchatka Leaf Warbler, *Phylloscopus examinandus*—formerly considered conspecific with Arctic Warbler, *Phylloscopus borealis* (AOU 2014);
 Saipan Reed Warbler, *Acrocephalus hiwae*—formerly considered conspecific with Nightingale Reed Warbler, *Acrocephalus luscinius* (Clements et al. 2013);
 Aguiguan Reed Warbler, *Acrocephalus nijoi*—formerly considered conspecific with Nightingale Reed Warbler, *Acrocephalus luscinius* (Clements et al. 2013);
 Pagan Reed Warbler, *Acrocephalus yamashinae*—formerly considered conspecific with Nightingale Reed Warbler, *Acrocephalus luscinius* (Clements et al. 2013);
 Laysan Honeycreeper, *Himatione fraithii*—formerly considered conspecific with Apapane, *Himatione sanguinea* (AOU 2015)
 Kauai Nukupu'u, *Hemignathus hanapepe*—formerly considered conspecific with Nukupuu, *Hemignathus lucidus* (AOU 2015);
 Maui Nukupu'u, *Hemignathus affinis*—formerly considered conspecific with

Nukupuu, *Hemignathus lucidus* (AOU 2015);
 Kauai 'Akialoa, *Akialoa stejnegeri*—formerly considered conspecific with Greater Akialoa, *Hemignathus ellisianus* (AOU 2015);
 Maui Nui 'Akialoa, *Akialoa lanaiensis*—formerly considered conspecific with Greater Akialoa, *Hemignathus ellisianus* (AOU 2015);
 O'ahu 'Akepa, *Loxops wolstenholmei*—formerly considered conspecific with Akepa, *Loxops coccineus* (AOU 2015);
 Maui 'Akepa, *Loxops ochraceus*—formerly considered conspecific with Akepa, *Loxops coccineus* (AOU 2015);
 Cassia Crossbill, *Loxia sinesciuris*—formerly considered conspecific with Red Crossbill, *Loxia curvirostra* (AOS 2017);
 Sagebrush Sparrow, *Artemisiospiza nevadensis*—formerly considered conspecific with Sage Sparrow, *Amphispiza belli* (AOU 2013);
 Morelet's Seedeater, *Sporophila moreletii*—formerly considered conspecific with White-collared Seedeater, *Sporophila torqueola* (AOS 2018).

(7) Remove seven species based on revised taxonomic treatments, either because a species is taxonomically merged with another species, either on or off the list; a species previously on the list is taxonomically split into multiple species and the new species is not known to occur within the United States or U.S. territories; or the species is considered extinct (following the

classification of the AOS or, for species not covered by the AOS, the Clements checklist or peer-reviewed literature) unless any of the following criteria apply: It is protected under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), or the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES; 27 U.S.T. 1087); it resembles extant species included in the list that may be affected by its removal; or its removal would create difficulties implementing the MBTA and its underlying Conventions. In each case, we reference the publication supporting these changes:

- Thayer's Gull, *Larus thayeri*, now a subspecies of Iceland Gull, *Larus glaucoides* (AOS 2017);
- Townsend's Shearwater, *Puffinus auricularis* (AOU 2015);
- Little Shearwater, *Puffinus assimilis* (AOU 2015);
- Brown Hawk-Owl, *Ninox scutulata* (AOU 2014);
- Caribbean Coot, *Fulica caribaea* (AOU 2016);
- Collared Kingfisher, *Todiramphus chloris* (Clements et al. 2015);
- White-collared Seedeater, *Sporophila torqueola* (AOS 2018).

(8) Revise the common (English) names of 40 species to conform to the most recent nomenclatural treatment as described in AOU publications 2011,

2012, 2013, 2014, 2015, 2016, AOS 2017, AOS 2018, and Clements et al. (2017). Hawaiian species names are modified to official Hawaiian spelling, following the Pukui-Elbert Hawaiian Dictionary, adding the diacritical marks to the common names where applicable. The Government Publishing Office Style Manual requires the words Hawaii and Kauai to be spelled without the diacritical mark. These revisions do not change the protective status of any of these taxa, only the names by which they are known. In each case, the update is described in the table, below.

(9) Revise the scientific names of 114 species to conform to the most recent nomenclatural treatment as described in AOU publications 2011, 2012, 2013, 2014, 2015, 2016, AOS 2017, AOS 2018, and Clements et al. (2017). These revisions do not change the protective status of any of these taxa, only the names by which they are known. In each case, the update is described in the table, below.

Table of Proposed Name Changes, as described in categories 8 and 9, above. Table is organized following AOS (2017) taxonomic order. The relevant AOS publication is provided. Hawaiian common name changes are indicated with a (—).

How is the list of migratory birds organized?

The species are listed in two formats to suit the needs of different segments of the public: alphabetically in 50 CFR 10.13(c)(1) and taxonomically in 50 CFR 10.13(c)(2). In the alphabetical listing, species are listed by common (English) group names, with the scientific name of each species following the English group name. This format, similar to that used in modern telephone directories, is most useful to members of the lay public. In the taxonomic listing, species are listed in phylogenetic sequence by scientific name, with the English name following the scientific name. To help clarify species relationships, we also list the higher-level taxonomic categories of Order, Family, and Subfamily. This format follows the sequence adopted by the AOS (1998, 2017) and is most useful to ornithologists and other scientists.

What species are not protected by the Migratory Bird Treaty Act?

The MBTA does not apply to:

(1) Nonnative species introduced into the United States or U.S. territories by means of intentional or unintentional human assistance that belong to families or groups covered by the Canadian, Mexican, or Russian Conventions. Elsewhere in today's **Federal Register**, we publish a notice of availability of the draft revised list of nonnative bird species that are not protected under the MBTA. Note, though, that native species that are introduced into parts of the United States where they are not native are still protected under the MBTA regardless of where they occur in the United States or U.S. territories.

(2) Species native or nonnative to the United States or U.S. territories that either belong to families or groups not referred to in the Canada, Mexico, and Russia Conventions or are not included by species name in the Japan Convention. This includes the Tinamidae (tinamous), Megapodiidae (megapodes), Cracidae (chachalacas), Odontophoridae (New World quail), Phasianidae (grouse, ptarmigan, and

turkeys), Pteroclididae (sandgrouse), Heliornithidae (finfoots), Burhinidae (thick-knees), Glareolidae (pratincoles), Todidae (todies), Psittacidae (parrots), Psittaculidae (Old World parrots), Meliphagidae (honeyeaters), Dicruridae (drongos), Monarchidae (monarchs), Pycnonotidae (bulbuls), Scotocercidae (bush warblers and allies), Zosteropidae (white-eyes), Sturnidae (starlings, except as listed in Japanese treaty), Ploceidae (weavers), Estrildidae (estrildid finches), and Passeridae (Old World sparrows, including house or English sparrow), as well as numerous other families not represented in the United States or U.S. territories.

Public Comments

Any final action resulting from this proposed rule must be based on the best scientific and commercial data available and be as accurate and as effective as possible. We request comments or information from other concerned governmental agencies, the scientific community, industry, or any other

interested parties concerning this proposed rule.

Please include sufficient information with your submission (such as electronic copies of scientific journal articles or other publications, preferably in English) to allow us to verify any scientific or commercial information you include.

You may submit your comments and materials concerning this proposed rule by one of the methods listed in **ADDRESSES**. We request that you send comments only by the methods described in **ADDRESSES**.

If you submit information via <http://www.regulations.gov>, your entire submission—including any personal identifying information—will be posted on the website. If your submission is made via a hardcopy that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopy submissions on <http://www.regulations.gov>.

Comments and materials we receive, as well as supporting documentation we used in preparing this proposed rule, will be available for public inspection on <http://www.regulations.gov>, or by appointment, during normal business hours, at the U.S. Fish and Wildlife Service, Division of Migratory Bird Management (see **FOR FURTHER INFORMATION CONTACT**).

Required Determinations

Regulatory Planning and Review

Executive Order (E.O.) 12866 provides that the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget will review all significant rules. OIRA has determined that this proposed rule is not significant.

E.O. 13563 reaffirms the principles of E.O. 12866, while calling for improvements in the nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. E.O. 13563 directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed

this proposed rule in a manner consistent with these requirements.

Executive Order 13771—Reducing Regulation and Controlling Regulatory Costs

This proposed rule is not an Executive Order (E.O.) 13771 (82 FR 9339, February 3, 2017) regulatory action because this proposed rule is not significant under E.O. 12866.

Regulatory Flexibility Act (5 U.S.C. 601 et seq.)

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*, as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996 (5 U.S.C. 804(2)), whenever an agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small government jurisdictions). However, no regulatory flexibility analysis is required if the head of an agency certifies the rule does not have a significant economic impact on a substantial number of small entities.

SBREFA amended the Regulatory Flexibility Act to require Federal agencies to provide the statement of the factual basis for certifying that a rule will not have a significant economic impact on a substantial number of small entities. We have examined this proposed rule's potential effects on small entities as required by the Regulatory Flexibility Act, and have determined that, if adopted as proposed, this action would not have a significant economic impact on a substantial number of small entities. This rule is an administrative action to update the list of migratory bird species protected under the Conventions. Consequently, we certify that, if adopted as proposed, this rule would not have a significant economic impact on a substantial number of small entities; therefore, a regulatory flexibility analysis is not required.

This proposed rule is not a major rule under SBREFA (5 U.S.C. 804(2)). It would not have a significant impact on a substantial number of small entities.

a. This proposed rule would not have an annual effect on the economy of \$100 million or more.

b. This proposed rule would not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

c. This proposed rule would not have significant adverse effects on

competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

Unfunded Mandates Reform Act

In accordance with the Unfunded Mandates Reform Act (2 U.S.C. 1501 *et seq.*), we have determined the following:

a. This proposed rule would not “significantly or uniquely” affect small governments. A small government agency plan is not required. This proposed rule is an administrative action to update the list of migratory bird species protected under the Conventions; it would not affect small government activities in any significant way.

b. This proposed rule would not produce a Federal mandate of \$100 million or greater in any year; *i.e.*, it is not a “significant regulatory action” under the Unfunded Mandates Reform Act.

Takings

In accordance with Executive Order 12630, this proposed rule does not have significant takings implications. This proposed rule does not contain a provision for taking of private property. Therefore, a takings implication assessment is not required.

Federalism

This proposed rule does not have sufficient Federalism effects to warrant preparation of a federalism summary impact statement under Executive Order 13132. It does not interfere with the States' ability to manage themselves or their funds. No significant economic impacts are expected to result from the updating of the list of migratory bird species.

Civil Justice Reform

In accordance with Executive Order 12988, the Office of the Solicitor has determined that this proposed rule does not unduly burden the judicial system and meets the requirements of sections 3(a) and 3(b)(2) of the Order.

Paperwork Reduction Act

This proposed rule does not contain information collection requirements, and a submission to the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) is not required. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

National Environmental Policy Act (NEPA)

Given that the proposed revision of 50 CFR 10.13 is strictly administrative in nature and will have no or minor environmental effects, it is categorically excluded from further NEPA requirements (43 CFR 46.210(i)).

Endangered Species Act (ESA)

Of the species on the List of Migratory Birds, 84 species, subspecies, or distinct population segments are also listed as endangered or threatened under section 4 of the ESA of 1973, as amended (16 U.S.C. 1531 *et seq.*). No legal complications arise from the dual listing as the two lists are developed under separate authorities and for different purposes. Because this proposed rule is strictly administrative in nature, it has no effect on endangered or threatened species. Thus, it does not require consultation under section 7 of the ESA.

Government-to-Government Relationship With Tribes

In accordance with the President's memorandum of April 29, 1994, "Government-to-Government Relations with Native American Tribal Governments" (59 FR 22951), Executive Order 13175, and 512 DM 2, we have evaluated potential effects on federally recognized Indian tribes and have determined that there are no potential effects. The proposed revisions to existing regulations in this rule are purely administrative in nature and do not interfere with the tribes' ability to manage themselves or their funds or to regulate migratory bird activities on tribal lands.

Energy Supply, Distribution, or Use (Executive Order 13211)

On May 18, 2001, the President issued Executive Order 13211 addressing regulations that significantly affect energy supply, distribution, and use. Executive Order 13211 requires agencies to prepare Statements of Energy Effects when undertaking certain actions. Because this proposed rule would only affect the listing of protected species in the United States, it is not a significant regulatory action under Executive Order 12866, and does not significantly affect energy supplies, distribution, or use. Therefore, this action is not a significant energy action and no Statement of Energy Effects is required.

Clarity of the Proposed Rule

We are required by Executive Orders 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain

language. This means that each rule we publish must:

- (1) Be logically organized;
- (2) Use the active voice to address readers directly;
- (3) Use clear language rather than jargon;
- (4) Be divided into short sections and sentences; and
- (5) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in **ADDRESSES**. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

Proposed Regulation Promulgation

For the reasons discussed in the preamble, we propose to amend title 50, chapter I, subchapter B, part 10 of the Code of Federal Regulations, as follows:

PART 10—GENERAL PROVISIONS

- 1. The authority citation for part 10 continues to read as follows:

Authority: 16 U.S.C. 668a–d, 703–712, 742a–j–l, 1361–1384, 1401–1407, 1531–1543, 3371–3378; 18 U.S.C. 42; 19 U.S.C. 1202.

- 2. Amend § 10.13 by revising paragraph (c) to read as follows:

§ 10.13 List of Migratory Birds.

* * * * *

(c) *What species are protected as migratory birds?* Species protected as migratory birds are listed in two formats to suit the varying needs of the user: Alphabetically in paragraph (c)(1) of this section and taxonomically in paragraph (c)(2) of this section. Taxonomy and nomenclature generally follow the 7th edition of the American Ornithologists' Union's (AOU, now recognized as American Ornithological Society (AOS)) *Check-list of North American birds* (1998, as amended through 2018). For species not treated by the AOS *Check-list*, we generally

follow *Clements Checklist of Birds of the World* (Clements et al. 2017).

(1) *Alphabetical listing.* Species are listed alphabetically by common (English) group names, with the scientific name of each species following the common name.

ACCENTOR, Siberian, *Prunella montanella*
 'AKEKE'E, *Loxops caeruleirostris*
 'AKEPA, Hawaii, *Loxops cocineus*
 Maui, *Loxops ochraceus*

(2) Taxonomic listing. Species are listed in phylogenetic sequence by scientific name, with the common (English) name following the scientific name. To help clarify species relationships, we also list the higher-level taxonomic categories of Order, Family, and Subfamily.
- Order ANSERIFORMES
Family ANATIDAE
Subfamily DENDROCYGNINAE
Dendrocygna autumnalis, Black-bellied Whistling-Duck
Dendrocygna arborea, West Indian Whistling-Duck
Dendrocygna bicolor, Fulvous Whistling-Duck
Subfamily ANSERINAE
Anser canagicus, Emperor Goose
Anser caerulescens, Snow Goose
Anser rossii, Ross's Goose
Anser albifrons, Greater White-fronted Goose
Anser erythropus, Lesser White-fronted Goose
Anser fabalis, Taiga Bean-Goose
Anser serrirostris, Tundra Bean-Goose
Anser brachyrhynchus, Pink-footed Goose
Branta bernicla, Brant
Branta leucopsis, Barnacle Goose
Branta hutchinsii, Cackling Goose
Branta canadensis, Canada Goose
Branta sandvicensis, Hawaiian Goose
Cygnus buccinator, Trumpeter Swan
Cygnus columbianus, Tundra Swan
Cygnus cygnus, Whooper Swan
Subfamily ANATINAE
Cairina moschata, Muscovy Duck
Aix sponsa, Wood Duck
Sibirionetta formosa, Baikal Teal
Spatula querquedula, Garganey
Spatula discors, Blue-winged Teal
Spatula cyanoptera, Cinnamon Teal

- Spatula clypeata*, Northern Shoveler
Mareca strepera, Gadwall
Mareca falcata, Falcated Duck
Mareca penelope, Eurasian Wigeon
Mareca americana, American Wigeon
Anas laysanensis, Laysan Duck
Anas wyvilliana, Hawaiian Duck
Anas zonorhyncha, Eastern Spot-billed Duck
Anas platyrhynchos, Mallard
Anas rubripes, American Black Duck
Anas fulvigula, Mottled Duck
Anas superciliosa, Pacific Black Duck
Anas bahamensis, White-cheeked Pintail
Anas acuta, Northern Pintail
Anas crecca, Green-winged Teal
