National Environmental Policy Act Compliance

The DEIS analyzes three land management alternatives. These include a “no action” alternative, under which the current management practices would be assumed to continue as guided by the 2018 California Forest Practice Rules. The proposed action consists of a two-subspecies HCP and associated permit with a 50-year term. One other “action” alternative is included. The Northwest Forest Plan (NWFP)/Sierra Nevada Forest Plan (SNFPA) Alternative (NWFP/SNFPA Alternative) proposes the development of a different two-subspecies HCP that would manage known and suspected nest stands according to the NWFP within the range of the NSO and the SNFPA within the range of the CSO.

Authority

We provide this notice under section 10(c) of the ESA (16 U.S.C. 1531 et seq.) and its implementing regulations (50 CFR 17.22), and NEPA (42 U.S.C. 4321 et seq.) and NEPA implementing regulations (40 CFR 1506.6).

Michael Fris, Assistant Regional Director, Pacific Southwest Region, Sacramento, California. [FR Doc. 2019–08933 Filed 5–1–19; 8:45 am]
Abstract: The Pittman-Robertson Wildlife Restoration Act (16 U.S.C. 669 et seq.) and the Dingell-Johnson Sport Fish Restoration Act (16 U.S.C. 777 et seq.), except 777e-1 and g-1, provide authority for Federal assistance to States for management and restoration of fish and wildlife. These Acts and our regulations in the Code of Federal Regulations (CFR) at 50 CFR part 80, subpart D, require that States, territories, and the District of Columbia annually certify their hunting and fishing license sales, States, and territories, and the District of Columbia that receive grants under these Acts use FWS Form 3-154, “State Fish and Wildlife Agency Hunting and Sport Fishing License Certification” to certify the number of hunting and fishing licenses sold. We use the information collected to apportion and distribute funds according to the formula specified in each Act. The Act is supported by regulations at 50 CFR 80.31 that require States to respond to the Service’s request for hunting and fishing license information by certifying the information in the format that the Director specifies and providing documentation to support the accuracy of this information. The Service requests the total number of unique hunting and fishing license holders as well as the number of resident and non-resident hunting and fishing licenses sold and associated costs. The methodology under the rule published at 76 FR 46150 (August 1, 2011) requires that States calculate net revenue to determine if an individual can be counted as a license holder.

With this renewal request, we are eliminating using two separate forms for this collection and combining all information to be collected into a single FWS Form 3–154. We made minor updates to Form 3–154 to improve functionality and reported data clarity. These changes do not increase the reporting burden and are expected to improve efficiency. The changes made in combining the forms and improving reporting by giving electronic alternatives will potentially, over time, reduce the public reporting burden for this collection.
