permit (ITP) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 et seq.). The applicant requests the ITP to take the federally listed sand skink (*Neoseps reynoldsi*) incidental to the construction of a housing development (project) in Lake County, Florida. We request public comment on the application, which includes the applicant’s proposed habitat conservation plan (HCP), and the Service’s preliminary determination that this HCP qualifies as “low-effect,” categorically excluded, under the National Environmental Policy Act. To make this determination, we used our environmental action statement and low-effect screening form, both of which are also available for public review.

**Project**

The applicant requests a 5-year ITP to take sand skinks through the conversion of approximately 1.73 acres (ac) of occupied sand skink foraging and sheltering habitat incidental to the construction of a housing development located on a 110.7-ac parcel in Section 1, 6, and 12, Township 23 South, Range 26 and 27 East, Lake County, Florida, identified by Parcel ID numbers 01–32–26–0004–00600, 12–23–26–0001–00200, 12–23–26–0001–00400, 12–23–26–0001–00500, and 12–23–26–0001–00600. The applicant proposes to mitigate for take of the sand skinks by the purchase of 3.46 credits from Lake Wales Ridge Conservation Bank or another Service-approved conservation bank. The Service would require the applicant to purchase the credits prior to engaging in activities associated with the project on the parcel.

**Public Availability of Comments**

Before including your address, phone number, email address, or other personal identifying information in your comment, be aware that your entire comment, including your personal identifying information, may be made available to the public. While you may request that we withhold your personal identifying information, we cannot guarantee that we will be able to do so.

**Our Preliminary Determination**

The Service has made a preliminary determination that the applicant’s project, including land clearing, infrastructure building, landscaping, and the proposed mitigation measures, would individually and cumulatively have a minor or negligible effect on sand skinks and the environment. Therefore, we have preliminarily concluded that the ITP for this project would qualify for categorical exclusion and the HCP is low effect under our NEPA regulations at 43 CFR 46.205 and 46.210. A low-effect HCP is one that would result in (1) minor or negligible effects on federally listed, proposed, and candidate species and their habitats; (2) minor or negligible effects on other environmental values or resources; and, (3) impacts that, when considered together with the impacts of other past, present, and reasonably foreseeable similarly situated projects, would not over time result in significant cumulative effects to environmental values or resources.

**Next Steps**

The Service will evaluate the application and the comments received to determine whether to issue the requested permit. We will also conduct an intra-Service consultation pursuant to section 7 of the ESA to evaluate the effects of the proposed take. After considering the above findings, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, the Service will issue ITP number TE 62782D–0 to Asma & Asma.

**Authority**

The Service provides this notice under section 10(c) (16 U.S.C. 1539(c)) of the ESA and NEPA regulation 43 CFR 1506.6.

**DEPARTMENT OF THE INTERIOR**

**Fish and Wildlife Service**

**Receipt of Incidental Take Permit Application and Proposed Habitat Conservation Plan for the Sand Skink, Lake County, FL; Categorical Exclusion**

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of availability; request for comment and information.

**SUMMARY:** We, the Fish and Wildlife Service (Service), announce receipt of an application from Michael Collard Properties Inc. (applicant) for an incidental take permit (ITP) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 et seq.). The applicant requests the ITP to take the federally listed sand skink (*Neoseps reynoldsi*) incidental to the construction of a residential subdivision (project) in Lake County, Florida. We request public comment on the application, which includes the applicant’s proposed habitat conservation plan (HCP), and the Service’s preliminary determination that this HCP qualifies as “low-effect,” categorically excluded, under the National Environmental Policy Act (NEPA; 42 U.S.C. 4231 et seq.). To make this determination, we used our environmental action statement and low-effect screening form, both of which are also available for public review.

**Project**

The applicant requests a 10-year ITP to take sand skinks through the conversion of approximately 0.34 acres (ac) of occupied sand skink foraging and
sheltering habitat incidental to the construction of a residential subdivision located on a 13.19-ac parcel in Section 6, Township 20 South, Range 26 East, Lake County, Florida, identified by the Lake County Property Appraiser as Alternate Keys 3022548, 1114501, and 1028698. The applicant proposes to mitigate for take of the sand skinks by the purchase of 0.68 credits from Lake Livingston Conservation Bank or another Service-approved Conservation Bank. The Service would require the applicant to purchase the credits prior to engaging in activities associated with the project on the parcel.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, be aware that your entire comment, including your personal identifying information, may be made available to the public. While you may request that we withhold your personal identifying information, we cannot guarantee that we will be able to do so.

Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects and present-day Indian Tribes or Native Hawaiian organizations.

DATES: Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request with information in support of the request to Columbus State University at the address in this notice by June 15, 2020.

ADDRESSES: Danielle Cook, Columbus State University, 4225 University Avenue, Columbus, GA 31907, telephone (706) 507–8063, email cook_danielle@columbusstate.edu.

SUPPLEMENTARY INFORMATION: Notice is hereby given in accordance with the

History and Description of the Remains

Between 1957 and 1983, human remains were represented, at minimum, 28 individuals were removed from the Abercrombie site (1RU61) in Phenix City, AL. In the fall of 2016, the collection was loaned to Fort Benning by the Columbus Museum for the purpose of a display to be created by Fort Benning and displayed at the Columbus Museum. While the collection was in the possession of Fort Benning, human remains were identified. In the spring of 2017, Fort Benning, the Columbus Museum, and Columbus State University (CSU) agreed that ownership of the collection should be transferred to Columbus State University. CSU identified 28 individuals and 798 associated funerary objects. The 798 associated funerary objects are five glass beads, 33 whelk
