Receipt of Incidental Take Permit Application and Proposed Habitat Conservation Plan for Indiana Bat and Northern Long-Eared Bat for the Forestry Habitat Conservation Plan for Bats on Pennsylvania State Game Lands, State Forests, and State Parks; and Draft Environmental Assessment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of documents; request for comment and information.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the receipt of an application from the Pennsylvania Game Commission (PGC) and Pennsylvania Department of Conservation and Natural Resources (DCNR) (applicants), for an incidental take permit (ITP) under the Endangered Species Act (ESA). The applicants request the ITP for the federally endangered Indiana bat (Myotis sodalis) and threatened northern long-eared bat (Myotis septentrionalis) incidental to otherwise lawful activities associated with forestry activities on State Game Lands, State Forests, and State Parks.

The applicants propose a conservation program to minimize and mitigate for the unavoidable incidental take as described in their Forestry Habitat Conservation Plan for Bats on Pennsylvania State Game Lands, State Forests, and State Parks (HCP). We request public comment on the application, which includes the applicants’ proposed HCP, and the Service’s draft environmental assessment, prepared pursuant to the National Environmental Policy Act. We provide this notice to seek comments from the public and Federal, Tribal, State, and local governments.

DATES: We will accept comments received or postmarked on or before August 21, 2020.

ADDRESSES:

Submitting Comments: You may submit comments by one of the following methods:

For additional information about submitting comments, see Request for Public Comments and Public Availability of Comments under SUPPLEMENTARY INFORMATION.

FOR FURTHER INFORMATION CONTACT: Pamela R. Shellengerber, by telephone at 814–234–4090, extension 7459, Hearing or speech impaired individuals may call the Federal Relay Service at 800–877–8339 for TTY assistance.

SUPPLEMENTARY INFORMATION:
Background
Section 9 of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 et seq.), and its implementing regulations prohibit the “take” of animal species listed as endangered or threatened. Take is defined under the ESA as to “harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect “listed animal species”, or to attempt to engage in such conduct” (16 U.S.C. 1538). However, under section 10(a) of the ESA, we may issue permits to authorize incidental take of listed species. “Incidental take” is defined by the ESA as take that is incidental to, and not the purpose of, carrying out an otherwise lawful activity. Regulations governing incidental take permits for endangered and threatened species, respectively, are found in the Code of Federal Regulations at 50 CFR 17.22 and 50 CFR 17.32.

Proposed Project
The applicants request a 30-year incidental take permit (ITP) for take of the federally listed endangered Indiana bat and the federally listed threatened northern long-eared bat (covered species) incidental to forestry activities on 4 million acres of State Game Lands, State Forests, and State Parks (covered lands). PGC manages 1.5 million acres of State Game Lands, and DCNR manages 2.2 million acres of State Forests and 300,000 acres of State Parks. These predominantly forested lands provide potential foraging, roosting, maternity colony, and fall swarming habitat for all bat species that occur in Pennsylvania, including the Indiana bat and northern long-eared bat. The applicants determined that forestry activities on these lands are reasonably certain to result in unavoidable incidental take of these federally listed covered species. Activities that could result in incidental take of Indiana bats and northern long-eared bats (covered activities) can be categorized in five major groups—timber harvest, operations (fencing and firewood collection), road and trail construction and maintenance, prescribed fire, and implementation of the conservation program.

The HCP includes measures to minimize and mitigate impacts to the covered species, including but not limited to implementing seasonal restrictions on various activities, installing bat-safe gates at known hibernacula, removing air flow obstructions around known hibernacula, minimizing impacts to summer roosting habitat, avoiding timber harvest effects on non-volant pups in maternity colonies, seasonally restricting prescribed fire, avoiding activities within 50 feet of riparian areas, installing artificial roost structures, and identifying, assessing, protecting, and enhancing potential hibernacula.

We request public comments on the permit application, which includes a proposed HCP, and an EA prepared in accordance with NEPA.

The applicants’ HCP describes the activities that will be undertaken to implement forestry activities, as well as the mitigation and minimization measures proposed to address the impacts to the covered species. Pursuant to NEPA, the EA analyzes the impacts the ITP’s issuance would have on the covered species and the environment.

National Environmental Policy Act
The issuance of an ITP is a Federal action that triggers the need for compliance with NEPA (42 U.S.C. 4321 et seq.). We prepared a draft EA that analyzes the environmental impacts on the human environment resulting from three alternatives: A no-action alternative, the HCP with specific timber harvest restrictions, and the proposed action. The proposed action alternative is issuance of the ITP and implementation of the HCP as submitted by the applicants. The applicants anticipate affecting 19,770 acres annually for Indiana bats, which accounts for less than 1 percent of all State Lands, and 130,366 acres annually for northern long-eared bats which accounts for 3.3 percent of all State Lands.

Next Steps
The Service will evaluate the application and the comments received to determine whether the permit application meets the requirements of
section 10(a) of the ESA (16 U.S.C. 1531 et seq.). We will also conduct an intra-
Service consultation pursuant to section 7 of the ESA to evaluate the effects of the proposed take. After considering the above findings, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, the Service will issue the requested ITP to the applicants.

Public Comments
The Service invites the public to comment on the proposed HCP and draft EA during a 30-day public comment period (see DATES). You may submit comments by one of the methods shown under ADDRESSES.

Public Availability of Comments
We will post on http://regulations.gov all public comments and information received electronically or via hardcopy. All comments received, including names and addresses, will become part of the administrative record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request in your comment that we withhold your personal identifying information in your comment, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Authority
The Service provides this notice under section 10(c) (16 U.S.C. 1539(c)) of the ESA and NEPA regulation 40 CFR 1506.6.

Pamela Toschik,
Acting Assistant Regional Director, Ecological Services, North Atlantic-Appalachian Region.

Endangered and Threatened Wildlife and Plants; Recovery Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, invite the public to comment on the following applications for a permit to conduct activities intended to recover and enhance endangered species survival. With some exceptions, the Endangered Species Act of 1973, as amended (ESA), prohibits certain activities that may impact endangered species unless a Federal permit allows such activity. The ESA also requires that we invite public comment before issuing these permits.

DATES: To ensure consideration, please submit your written comments by August 21, 2020.

ADDRESSES:
Document availability: Request documents by phone or email: Susan Jacobsen, 505–248–6641, susan_jacobsen@fws.gov.

Comment submission: Submit comments by email to fw2_te_permits@fws.gov. Please specify the permit you are interested in by number (e.g., Permit No. TE–123456).

FOR FURTHER INFORMATION CONTACT:
Susan Jacobsen, Chief, Classification and Restoration Division, 505–248–6641. Individuals who are hearing or speech impaired may call the Federal Relay Service at 1–800–877–8339 for TTY assistance.

SUPPLEMENTARY INFORMATION:

Background
With some exceptions, the ESA prohibits activities that constitute take of listed species unless a Federal permit is issued that allows such activity. The ESA’s definition of “take” includes hunting, shooting, harming, wounding, or killing but also such activities as pursuing, harassing, trapping, capturing, or collecting.

The ESA and our implementing regulations in the Code of Federal Regulations (CFR) at title 50, part 17, provide for issuing such permits and require that we invite public comment before issuing permits for activities involving endangered species.

A recovery permit we issue under the ESA, section 10(a)(1)(A), authorizes the permittee to conduct activities with endangered or threatened species for scientific purposes that promote recovery or enhance the species’ propagation or survival. These activities often include such prohibited actions as capture and collection. Our regulations implementing section 10(a)(1)(A) for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Permit Applications Available for Review and Comment

Documents and other information submitted with these applications are available for review by any party who submits a request as specified in ADDRESSES. Releasing documents is subject to Privacy Act (5 U.S.C. 552a) and Freedom of Information Act (5 U.S.C. 552) requirements.

Proposed activities in the following permit requests are for the recovery and enhancement of propagation or survival of the species in the wild. We invite local, State, Tribal, and Federal agencies and the public to submit written data, views, or arguments with respect to these applications. The comments and recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies. Please refer to the application number when submitting comments.
