Abstract: The Migratory Bird Treaty Act (MBTA; 16 U.S.C. 703 *et seq.*) implements four treaties concerning

migratory birds signed by the United States with Canada, Mexico, Japan, and Russia. These treaties require that we preserve most U.S. species of birds, and prohibit activities involving migratory birds, except as authorized by regulation. Under the MBTA, it is unlawful to take, possess, import, export, transport, sell, purchase, barter—or offer for sale, purchase, or barter—migratory birds or their parts, nests, or eggs, except as authorized by regulation. This information collection is associated with our regulations that implement the MBTA. We collect information concerning depredation actions taken to determine the number of take of birds of each species each year and whether the control actions are likely to affect the populations of those species.

Annual Report (FWS Form 3-2436)

Regulations at 50 CFR 21 establish depredation orders and impose reporting and recordkeeping requirements. All persons or entities acting under depredation orders must provide an annual report. The capture and disposition of all non-target migratory birds, including Endangered, Threatened, or Candidate species must be reported on the Annual Report. In addition to the name, address, phone number, and email address of each person or entity operating under the Order, we collect the following information for each target and non-target species taken:

- Species taken,
- Number of birds taken,
- Months and years in which the birds were taken,
- State(s) and county(ies) in which the birds were taken,
- General purpose for which the birds were taken (such as for protection of agriculture, human health and safety, property, or natural resources), and
- Disposition of non-target species (released, sent to rehabilitation facilities, etc.).

We use the information to:

- Identify the person or entity acting under depredation orders;
- Assess the impact to non-target migratory birds or other species;
- Ensure that agencies and individuals operate in accordance with the terms, conditions, and purpose of the orders;
- Inform us as to whether there are areas in which control activities are concentrated and might be conducted more efficiently; and
- Help gauge the effectiveness of the following orders in mitigating order-specific related damages:
