this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax:202–395–5806, Email: OIRA Submission@omb.eop.gov.

FOR FURTHER INFORMATION CONTACT: Anna P. Guido, Reports Management Officer, QMAC, Department of Housing and Urban Development, 451 7th Street, SW, Washington, DC 20410; email her at Anna.P.Guido@hud.gov or telephone 202–402–5535. This is not a toll-free number. Person with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339. Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The Federal Register notice that solicited public comment on the information collection for a period of 60 days was published on February 14, 2020 at 85 FR 8604.

A. Overview of Information Collection

Title of Information Collection: Strategies for Removing the Regulatory Impediments to the Financing and Siting of Factory-Built Housing in American Communities.

OMB Approval Number: 2528–New. Type of Request: New. Form Number: N/A.

Description of the need for the information and proposed use: To assess the cost-effectiveness of factory-built housing as a potential affordable housing option in urban and suburban communities, HUD seeks to better understand the regulatory barriers preventing or limiting the use of factory-built housing. This study is framed by the general research question: What are the main drivers or barriers to the financing, siting and development of factory-built housing systems in various communities? A significant portion of the work of this study will involve identifying the types of barriers, their potential impact (or stringency), and their use in various communities. This process will involve research on several different communities in order to develop a typology of different barriers, catalog the community contexts where different barriers are more prevalent, and develop opportunity cost estimates of different barriers in different contexts. Information will be collected online and by telephone from local land use planning officials and manufacturers and dealers of factory-built housing to help determine the extent to which regulatory barriers limit the development of factory-built housing systems as an affordable housing option.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
(2) The accuracy of the agency’s estimate of the burden of the proposed collection of information;
(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

(5) Ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Anna P. Guido, Department Reports Management Officer, Office of the Chief Information Officer. [FR Doc. 2020–27924 Filed 12–17–20; 8:45 am]

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–HQ–MB–2020–N151; FF09M21200–201–FMB12310998BP; OMB Control Number 1018–0171]

Agency Information Collection Activities: Submission to the Office of Management and Budget for Review and Approval; Establishment of Annual Migratory Bird Hunting Seasons

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the U.S. Fish and Wildlife Service (Service), are proposing to renew an information collection.

DATES: Interested persons are invited to submit comments on or before January 19, 2021.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAmain. Find this particular information collection by selecting “Currently under Review—Open for Public Comments” or by using the search function. Please provide a copy of your comments to the Service Information Collection Clearance Officer, U.S. Fish and Wildlife Service, MS: PRB [JAO/3W], 5275 Leesburg Pike, Falls Church, VA 22041–3803 (mail); or by email to Info_Coll@fws.gov. Please reference OMB Control Number 1018–0171 in the subject line of your comments.
FOR FURTHER INFORMATION CONTACT:
Madonna L. Baucum, Service
Information Collection Clearance
Officer, by email at Info_Coll@fws.gov,
or by telephone at (703) 358–2503.
Individuals who are hearing or speech
impaired may call the Federal Relay
Service at 1–800–877–8339 for TTY
assistance. You may also view the
information collection request (ICR) at
http://www.reginfo.gov/public/do/
PHRMain.

SUPPLEMENTARY INFORMATION: In
accordance with the Paperwork
Reduction Act of 1995 (PRA, 44 U.S.C.
3501 et seq.) and 5 CFR 1320.8(d)(1), we
provide the general public and other
Federal agencies with an opportunity to
come on new, proposed, revised,
and continuing collections of
information. This helps us assess the
impact of our information collection
requirements and minimize the public’s
reporting burden. It also helps
the public understand our information
collection requirements and provide the
requested data in the desired format.

On April 2, 2020, we published in the
Federal Register (85 FR 18532) a
proposed rule to begin the process of
establishing migratory bird hunting
regulations for certain Tribes on Federal
Indian reservations, off-reservation trust
lands, and ceded lands for the 2020–21
migratory bird hunting season. That
Federal Register document also
contained notice of our intent to request
that OMB approve this related
information collection. In that notice,
we solicited comments for 60 days,
ending on June 1, 2020. We did not
receive any comments in response to
that proposed rule.

Additionally, on May 1, 2020, the
Migratory Bird Program shared the
proposed rule document with the
Flyway Council representatives to
solicit their feedback on the information
collection requirements. We extended
the comment period for the Flyway
Councils to provide comments until
October 30, 2020, so that they could
share the information during their
annual August/September Flyway
Council meetings. We did not receive
any comments in response to that
additional comment opportunity.

As part of our continuing effort to
reduce paperwork and respondent
burdens, we are again soliciting
comments from the public and other
Federal agencies on the proposed
information collection request (ICR) that
is described below. We are especially
interested in public comment
addressing the following:

(1) Whether or not the collection of
information is necessary for the proper
performance of the functions of the
agency, including whether or not the
information will have practical utility;

(2) The accuracy of our estimate of the
burden for this collection of
information, including the validity of
the methodology and assumptions used;

(3) Ways to enhance the quality,
utility, and clarity of the information to
be collected; and

(4) How might the agency minimize
the burden of the collection of
information on those who are to
respond, including through the use of
appropriate automated, electronic,
mechanical, or other technological
collection techniques or other forms of
information technology, e.g., permitting
electronic submission of response.

Comments that you submit in
response to this notice are a matter of
public record. Before including your
address, phone number, email address,
or other personal identifying
information in your comment, you
should be aware that your entire
comment—including your personal
identifying information—may be made
publicly available at any time. While
you can ask us in your comment to
withhold your personal identifying
information from public review, we
cannot guarantee that we will be able
to do so.

Abstract: Migratory game birds are
those bird species so designated in
conventions between the United States
and several foreign nations for the
protection and management of these
birds. Under the Migratory Bird Treaty
Act (16 U.S.C. 703–712), the Secretary
of the Interior is authorized to
determine when “hunting, taking,
capture, killing, possession, sale,
purchase, shipment, transportation,
carriage, or export of any * * * bird, or
any part, nest, or egg” of migratory game
birds can take place, and to adopt
regulations for this purpose. These
regulations are written after giving due
regard to “the zones of temperature and
to the distribution, abundance,
economic value, breeding habits, and
times and lines of migratory flight of
such birds” and are updated annually
(16 U.S.C. 704(a)). This responsibility
has been delegated to the Service as the
lead Federal agency for managing and
conserving migratory birds in the
United States. However, migratory game
bird management is a cooperative effort
of State, Tribal, and Federal
governments. Migratory game bird
hunting seasons provide opportunities
for recreation and sustenance; aid
Federal, State, and Tribal governments
in the management of migratory game
birds; and permit harvests at levels
compatible with migratory game bird
population status and habitat
conditions.

The Service develops migratory game
bird hunting regulations by establishing
the frameworks, or outside limits, for
season lengths, bag limits, and areas for
migratory game bird hunting.

Acknowledging regional differences in
hunting conditions, the Service has
administratively divided the Nation into
four Flyways for the primary purpose of
managing migratory game birds. Each
Flyway (Atlantic, Mississippi, Central,
and Pacific) has a Flyway Council, a
formal organization generally composed
of one member from each State and
Province in that Flyway. The Flyway
Councils, established through the
Association of Fish and Wildlife
Agencies, also assist in researching and
providing migratory game bird
management information for Federal,
State, and Provincial governments, as
well as private conservation entities and
the general public.

We request the following information
to establish annual migratory bird
hunting seasons:

Information Requested To Establish
Annual Migratory Bird Hunting
Seasons

As a result of the incremental annual
rulemaking process explained above, the
information requested from States is
solicited during a different point in the
overall rulemaking process than the
information requested from Tribal
governments. However, the final rules
published at the end of the rulemaking
process each year incorporate all
information received from the State and
Tribal governments. Therefore, this ICR
incorporates both the annual requests
for Tribal proposals in the proposed
rules and the information requested
annually from the States during
subsequent proposed rules (all under
the same Regulatory Identifier Number;
we post all rules electronically on the
Service’s website [https://www.fws.gov/
policy/froystem/default.cfm]. State and
Tribal governments are aware of this
process that affords them the
opportunity to provide comments on the
information collection requirements
identified in the PRA section of each
rule.

The information identified below,
necessary to establish annual migratory
bird hunting seasons, is solicited
annually from State (including U.S.
territory) and Tribal governments. The
required information, received at
various times in the year prior to the
actual hunting season as part of the
rulemaking process described above, is
used by the Service as part of the final
rulemaking process necessary to open
annual hunting seasons otherwise closed by law.

Details Needed From States and U.S. Territories

State and U.S. territory governments that wish to establish annual migratory game bird hunting seasons are required to provide the requested dates and other details for hunting seasons in their respective States or Territories. The information is provided to the Service in a non-form format, usually via letter or spreadsheet, in response to solicitations for the information sent to the State governments each year via an emailed letter and as part of the first final rule (for the frameworks).

Details Needed From Tribal Governments

Tribes that wish to use the guidelines (published June 4, 1985, 50 FR 23459—copy uploaded to ROCIS) to establish special hunting regulations for the annual migratory game bird hunting season are required to submit a proposal that includes:

(1) The requested migratory game bird hunting season dates and other details regarding the proposed regulations;
(2) Harvest anticipated under the proposed regulations; and
(3) Tribal capabilities to enforce migratory game bird hunting regulations.

For those situations where it could be shown that failure to limit Tribal harvest could seriously impact the migratory game bird resource, we also request information on the methods employed to monitor harvest and any potential steps taken to limit level of harvest.

A Tribe that desires the earliest possible opening of the migratory game bird season for nontribal members should specify this request in its proposal, rather than request a date that might not be within the final Federal frameworks. Similarly, unless a Tribe wishes to set more restrictive regulations than Federal regulations will permit for nontribal members, the proposal should request the same daily bag and possession limits and season length for migratory game birds that Federal regulations are likely to permit the States in the Flyway in which the reservation is located.

Reports (50 CFR part 20): The following reports are requested from the States and are submitted either annually or every 3 years as explained in the following text.

Reports From Experimental Hunting Seasons and Season Structure Changes (Required)

Atlantic Flyway Council
- Delaware—Experimental tundra swan season (Yearly updates and Final report).
- Florida (completed)—Experimental teal-only season (Yearly updates and Final report).

Mississippi Flyway Council
- Alabama—Experimental sandhill crane season (Yearly updates and Final report).

Central Flyway Council
- Nevada (completed)—Experimental teal season (Yearly updates and Final report).
- New Mexico—Sandhill crane season in Estancia Valley: Yearly updates and Final report. This report was changed from experimental to operational. Annual data are still required, but there is not a final report, since this monitoring will occur in perpetuity (or as long as the State has that hunt area).
- Wyoming—split (three-way) season for canee geese (Final report only).

Pacific Flyway Council
- California—Zones and split season for white-fronted geese (Final report only).

Additional State-Specific Annual Reports

State-Specific
- Arizona—Sandhill crane racial composition of the harvest conducted at 3-year intervals.
- North Carolina and Virginia—Tundra swan harvest and hunter participation data (Yearly).
- Montana (Central Flyway portion), North Dakota, and South Dakota—Tundra swan harvest and hunter participation data (Yearly).
- Montana (Pacific Flyway portion)—Sawn harvest-monitoring program to measure species composition (Yearly).
- Montana (Pacific Flyway portion), Utah, and Nevada—Swan harvest-monitoring program to measure the species composition and report dwelling swan harvest, hunter participation, reporting compliance, and monitoring of swan populations in designated hunt areas (Yearly).

Reports and monitoring are used for a variety of reasons. Some are used to monitor species composition of the harvest for those areas where species intermingling can confound harvest management, and potential overharvest of one species can be of management concern. Others are used to determine overall harvest for those species and/or areas that are not sampled well by our overall harvest surveys due to either the limited nature/area of the hunt or season, or where the harvest needs to be closely monitored. Experimental season reports are used to determine whether the experimental season is achieving its intended goals and objectives, without causing unintended harm to other species and ultimately whether the experimental season should proceed to operational status. Most experimental seasons are 3-year trials with yearly reports and a final report. Most of the other reports and monitoring are conducted either annually or at 3-year intervals.

OMB Control Number: 1018–0171.
Form Numbers: None.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: State and Tribal governments.

Total Estimated Number of Annual Respondents: 82 (from 52 State governments and Territories and 30 Tribal governments).

Total Estimated Number of Annual Responses: 99 (includes State and Tribal governments and additional reports from States).

Estimated Completion Time per Response: Varies from 4 hours to 650 hours, depending on activity.

Total Estimated Number of Annual Burden Hours: 9,878.

Respondent’s Obligation: Required to obtain or retain a benefit.

Frequency of Collection: Annually.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

Madonna Baucum,
Information Collection Clearance Officer, U.S. Fish and Wildlife Service.
