| 2 | Goldenrod | 6 | Joe-Pye Weed |
| 3 | Blazing Star | 7 | Sunflower |
| 4 | Wild Bergamot | 8 | New England Aster |

Metamorphosis

Metamorphosis is the series of developmental stages immature insects go through to become adults. The four stages of a butterfly's life are:

- | | | | |
|----|---------------------------|----|------------------------|
| D1 | Egg | D3 | Pupa (chrysalis stage) |
| D2 | Larva (caterpillar stage) | D4 | Adult |

It takes a monarch butterfly about 28 to 38 days to complete its life cycle.
