

U.S. Fish & Wildlife Service  
Bay Delta Fish & Wildlife Office  
FACT SHEET

## Action Area

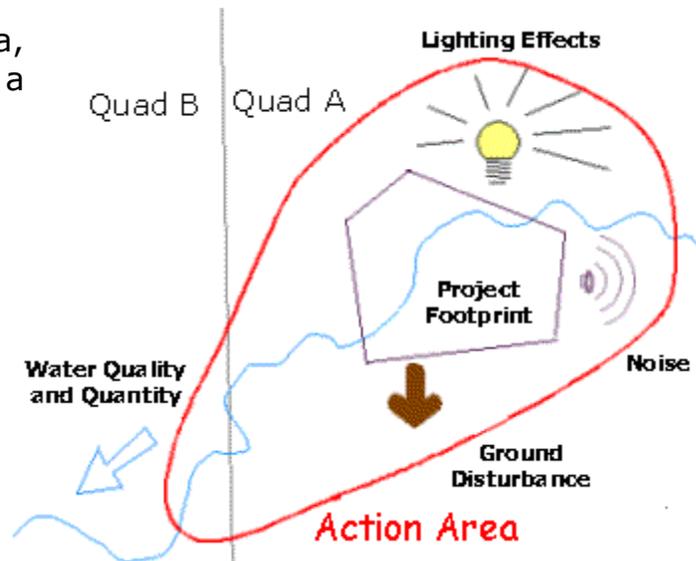

*For consultation under the Endangered Species Act*  
It's more than the project footprint

*Project Action Area* refers to the area directly or indirectly affected by the proposed action. This area will usually be larger than the project footprint.

To determine your action area, mark the project footprint on a topo map.

Identify the range of impacts such as:

1. Ground disturbance
2. Changes in water quality and quantity (both surface and underground water)
3. Air quality
4. Lighting effects
5. Noise disturbance

Draw a line around all of the affected areas. This is the action area. Send us a copy of the map when you initiate consultation.

Example: In the diagram on this page, the project affects water quality or quantity downstream. So the applicant should obtain a species lists for both Quad A and Quad B.
