Hi Pat,

I just wanted to know if MZ 7 should be looked at since it was not mentioned in Nicole's EM. I did not have a question about deadlines. There does not appear to be too many CE's in MZ 7 so I should be able to incorporate reviews of those as well as MZ 2 by Thursday.

Terry -

The deadline is not up for discussion (and was identified at the writing meeting in January) as the modelers need the information to complete their work. I would suggest logging into the CED and seeing how many projects there are to review in both MZ 2 and 7. If excessive, prioritize MZ 2 but as many as you can complete for MZ 7 will increase the accuracy of the modeling effort.

Hi Pat,

I just read Nicole's 2/17 EM regarding our upcoming CED review and noticed it said that energy development reviews must be completed by 2/26 in MZ 1 and 2. What about MZ 7? MZ 7 includes the Parachute-Piceance-Roan (PPR) Population as well as the Meeker-White River Population and both have energy development in them, especially PPR. I have registered but not looked in the CED yet so perhaps there are no CE's in MZ 7 but I would be surprised if there's none. Not that I wouldn't appreciate more time for reviews (til 3/13) but I thought I'd better check in case lack of MZ 7 was just an oversight. I'm sure there's probably some in MZ 2 in CO I will have to review by 2/26. Anyhow, if you could dig up an answer so I know potential workload that would be great, thanks!
