Subject: Re: GrSG GIS Team - Please review and comment ASAP
Date: Tuesday, February 24, 2015 11:15:21 AM

Questions have come up about the differences between the data that the GIS Team has identified and what some of the field offices think the numbers should be. The document is trying to provide information about what the GIS Team has done and how field offices developed their data. We need to communicate relevant information to help inform what data should be used and when.

Hi Jim,

I asked, and Drue gave me permission to circulate this with the GIS team this morning. I will let him and Kate answer your question.

Before I send any response/comments. Can you tell me where this is coming from. Who are asking these questions?

Thanks,
Jim

Hi Jim and Ed,

I am hoping you could provide a quick turn-around review of this document. Rich is out of the office.

This issue paper is fairly self-explanatory, and was the result of a meeting that I could not attend last week because I was out of town. The initial driver of this question were the acreage calculations that I provided for the external affairs state fact sheets on surface ownership in GrSG range. However, the issue is actually a bit larger than this one example, pertaining to how we determine what data sources we use for GIS analysis.

Please let me know if you can provide your comments and return by COB today.
