Hi Ed,

Oh, I see you did edit the document. I will edit that and provide to Drue and Kate.

Lara, Here are my thoughts. Overall, things will be different unless we base the numbers on the new data runs we are currently doing. If we need to build state by state, do we really have that much time?

Just let me know and I'll will start looking for stuff.

Thanks, Ed

Hi Jim and Ed,

I am hoping you could provide a quick turn-around review of this document. Rich is out of the office.

This issue paper is fairly self-explanatory, and was the result of a meeting that I could not attend last week because I was out of town. The initial driver of this question were the acreage calculations that I provided for the external affairs state fact sheets on surface ownership in GrSG range. However, the issue is actually a bit larger than this one example, pertaining to how we determine what data sources we use for GIS analysis .

Please let me know if you can provide your comments and return by COB today.
