I'd be happy to, Kevin.

Doug and Mevin,

I was hoping to go through the sage-grouse distribution and population modeling with you two and get your feedback. I have already spent a good bit of time discussing methods with the sage-grouse biologist within the USFWS, and the applied ecologist sect (Pete Coates USGS, Jeff Evans TNC, Brad Fedy University of Waterloo, Dave Nauge UM), and have gotten great feedback so far.

I just finished the range-wide distribution modeling last week and the population modeling this weekend. Ideally I would like to find a time early next week if you two are available. So, would you two be willing?

Cheers

Kevin
