Terry,

Upon cursory review, I agree with you. I'll finish sorting through these and holler your way, but it doesn't look like these agreements explicitly protect against ag conversion, and it appears as though the proponent identifies them more as addressing grazing.

When you get a chance I would like to talk to you about the ag conversion projects. I see them as grazing management projects especially since at least one of the 3 is on state owned land based upon the GIS point file.

I'll be in the office all day.

Right - I'll do the ag conversion, and looks like you have zero energy development. So the rest are needing completion by March 13th.

Hey Lief,

Just so I'm sure from the webinar yesterday and this email. I have no energy projects or ag conversion projects to review at this time?

Hi,

Sorry - point of clarification as you evaluate the actions addressing energy development in MZ 1 and 2. By COB Thursday, I'm only needing those actions that address oil & gas. The rest (mining, transmission lines) can be completed by mid-March.

Apologies, I thought I said that on the webinar and it appears I did not. We're looking to get that information evaluated that may influence the modeling layers.

If you have any questions - holler.
