Hi. Saw your follow on note so this may be too late but the bottom line is there was a misapplication of allocation formulae to some aspects of the ID plan so BLM is working to correct same.

Subject: BLM Data

Hi Matt,

Can you remind me what RMPs the recently discovered problem was for that you told me about this afternoon? Idaho/SW MT?

I have made the command decision to put the data from this hard drive up on ScienceBase, simply zipped, with no ScienceBase metadata, but at least there.

I thought this would be good to have done in case we need to make the decision to merge the files ourselves in order to meet deadlines. That way, others can access it without having to rely on me or the BLM hard drive.
