That sounds like a great idea. I have totally awesome contaminants person, Kim Dickerson, in my office. And Pete Ramirez (retired) that use to be in my office. Either or both are super knowledgeable contaminants nerds and being from WY FO knowledge of sage-grouse by default. They might be willing. I'll find out what their workload is if you don't have others in mind.

Hi Amy,
I'm in the process of writing the contaminants section for the species report, and I'm thinking it would probably be wise to have review by someone in the Service's contaminants staff. Maybe they could review during the species expert review period? Any ideas on any contaminants staff who may also have some familiarity with sage-grouse? I can talk to Maria about who may be best in R6 for a quick review if you think that's a good idea.

Any thoughts would be appreciated!

Thanks,
Angela
