I think the big area of FS lands excluded in Owyhee were due to the results of the climate vortex model we incorporated. Basically it said the habitat is not likely to retain the capability of supporting shrub-steppe in light of changes in climate. So it was pulled out. Inclusion of the model was at the direction of Jim Lyons, DOI asst. secretary. I think that is why there little fingers are there too.

our GIS person put this together based on layers provided by Lara I believe.....we would like to excise areas where federal lands overlaps onto general and non-habitat.
