Yes. It means that R6 NWRS has identified lands beyond the BOR revocation boundary that have biological value and could, theoretically, be withdrawn (from the public domain and brought into the NWRS) to advance GrSG/sage-steppe conservation.

Subject: what does this final sentence mean?

- Region 6 NWRS is interested in considering additional, larger BLM withdrawals in order to advance GRSG and sage-steppe habitat in southwestern Wyoming.

Beyond what we ask for in this memo?

Subject: GRSG: Seedskaadee NWR enhancement concept
Importance: High

Noreen,

As requested, please see attached the subject document, in MS Word, and 3 supporting maps, in .pdf. Many thanks to Paul for burning the midnight oil to get this done. Paul is available to walk through these materials with you in advance of Dan's meeting this afternoon.

If we move forward with this concept, I recommend as a next step a larger discussion with Pat D. and others to further identify the biological values associated with these lands.

Please let us know if you have immediate questions or need additional information. Thanks.

Matt
