Pat, It was me at the SGIT. Erik blurs the lines of what the percentages refer to.

84% of the projects (DDCT & Deminimus) are compliant (234 DDCT + 336 Deminimus = 570 projects total and 105 were noncompliant)

Here is what WEG said - 'Somebody from WY at s-g conference said publicly that WY was 84% in compliance with core strategy.' There is a difference between projects being non-compliant and WY strategy being non compliant. The bulk of the non compliance was due to existing disturbance, fire, pre 2008 units and towns (Hudson). Even with the non-compliant we only added 26 acres for those 105 non-compliant projects.

Bob and Mary - this is all the clarification I got on the 16%. I don't know who from WY made the statement.

Somebody from WY at s-g conference said publicly that WY was 84% in compliance with core strategy. Also, we say on Douglas not in compliance with 5% disturbance. WEG says 50% of core not in compliance with dust caps.

**Subject:** 16%

Please let me know what you find out about the 16% not in compliance.

Is this perhaps a reference to the Douglas core area?

And then also the Molvar claim that 50% of core areas have exceeded the cap.
