Hi Kathy,

I was tasked with developing an outline for the regulatory mechanisms/conservation efforts chapter of the species report. That draft outline is attached. It includes a section on conservation efforts and the CED should provide summary statistics/metrics that we can use in this section of the species report. So, this is part of the discussion in that we need to make sure any queries/maps will be useful for summarizing conservation efforts in a way that we can articulate in the species report.

Jesse

Hi All, watch your inbox for a calendar invite so we can brainstorm on what types of CED queries/reports will be most useful for the status review writing team. We have a great opportunity to work with the writing team (and others) in person in Lakewood CO during the GRSg meeting Jan 13-15*, and I want to make the most of our time together. During our call, I would like to:

- Develop plan for making the most use of our time during the Lakewood Meeting
- Brainstorm on creating some straw dog reports for folks to review, tear

- apart and put back together again.
- Brainstorm on mechanics of breaking into small groups (by Population, by State, by threat, ???) to foster discussion and reporting out on their input.
 - Determine what type of "pre-work" would be appropriate, e.g. ask folks to register in the CED and running some sample queries.
 - Another item that need to be discussed include how/who/when the FWS (or contractor?) will accept or reject the self-reported effectiveness determinations in the CED. Perhaps Justin and Matt can help us develop an approach to "batch review" by partner, type of action, or whatever makes the most sense. Do we want to bring this up during the all hands meeting?
 - Jesse, I understand you are developing a worksheet/approach for evaluating conservation efforts - would this be part of this discussion?

*Justin and Matt, the CED session is currently scheduled for Jan 14, Wed afternoon at 2:00 pm, but it hasn't been locked in yet. I'm hoping the time won't change, but don't know for sure yet.
