Hi Pauline, Lief is getting your messages and you are approved. I'll follow up on why the error messages are popping up.

Lief and Kathy,

I'm trying to get access to enter data in the Conservation Efforts Database. When I click on the button to email either of you to get approval, I get an error each time. The error states that "The website is under construction" or "The website has a programming error".

So I'm not sure if you have received my request? I understand I only have until January 15 to enter my CCAA data, so I'm hoping you might be able to help me work through this glitch?

Thank you!

Pauline
