Subject: Follow-up on CED Webinar
To: "Leingang, Colin G CIV USARMY USAG (US)" <colin.g.leingang.civ@mail.mil>

Hi Collin, Our programmer is back and was able to help me answer the questions from our webinar earlier this week.

Q1. For the shapefiles, is any coordinate system OK?

Yes, any OGC compliant geometry is OK. Just try not to load any custom ones, I'm not sure if the footprint editor can handle them. Also, please assure that there are no self-intersecting polygons or other invalid geometries.

Q2. Do uploaded shapefiles auto-populate the CED fields the same as hand-digitizing?

Yes, Anything uploaded or digitized in the footprint editor will auto populated CED fields.

Q3. Can partners edit projects after they submit them for approval?

Yes. Authorized users can edit efforts at any time Also note that once approved, efforts can be modified, but once they are approved, if the Service

has already incorporated the information in status review analyses, there is no guarantee the edits will be incorporated. Also, the approver (Collin) will need to approve the changes, as it will revert back to draft status.

Q4. One more question came up after the meeting. We have several "plans" that would apply to the entire installation. Do we need to upload the installation boundary for each plan or can we just upload the spatial depiction of the boundary once and reference that particular plan spatial component in the other plan submittals?

Spatial information is required for each effort, so we'll need you to upload spatial info for each plan.

Hope this is helpful, and thanks for your work to conserve greater sage-grouse.

Hi Colin, here's the powerpoint I walked through earlier today. I've sent the follow-up questions to our programmer, and will share his responses as soon as I can.

Hi Kathy,

We would like to try and have it on 1/5/15 as you suggest. There will be myself and four others from the installation (Cc on this message). We requested access and have received usernames and passwords from the www.sciencebase.gov site as per the instructions sent out. We are currently trying to register on the CED site as well. We are currently compiling a list of data/reports we will consider for upload and will prioritize for submittal by the requested 1/15/15 suspense. We will likely be submitting additional

information past that date and understand that it may not be fully analyzed/incorporated by the Service.

Please pick a time on 1/5/15 and provide instructions on how to go about participating in the webinar to all on the email. Thanks, Colin

Sounds good. I'm pretty much booked this Monday (12/22/14), open the afternoon of the 23rd, and the morning of the 24th. Then available after 1/5/15, which may be best so the webinar will be "fresh" for your team after the holidays. How many folks do you think will be entering info for your group - do you think a doodle poll would be useful?

If you haven't done so, you may want to go ahead and register as a "demo user," and then we can get you, or whomever you want, set up as the "approving official" for the YTC.

Thanks for your work to conserve sage grouse, and I'm looking forward to helping you out with the CED.

Hi Kathy,

I was given your name by Jessie Gonzales (USFWS Wenatchee Field Office) who indicated you were the POC for possibly setting up a webinar regarding the CED sage-grouse data call. I have several staff that have now acquired access instructions to the site and we are preparing to submit data in response to the Service's request. Would it be possible to set-up a webinar for my staff to familiarize ourselves with the system? Please let me know how best to coordinate this with you.

Colin
