Well, I guess so...it means that they should be addressed and changed in the document in order to be sufficient.

Hi Carey,

Dumb question, but want to be clear...Do comments above complete your review?

Just a few comments:

- Is there no new information that we should include other than the COT report (and the model of course that is not done)? At the headers for the tables, make sure to include that the info came from the COT report.
- Why are we including information about Bi-State in the tables? I don't think that should be mentioned.
- We talk about FF but don't say what timeframe we are using. Do we know what it is?
- Can we explain a little more about the CRP lands and how we know some lands will go back into cropland (referenced on pg. 15). How do we know they will go back to cropland - how much has gone back into cropland in the past?
