Just a head's up - to my knowledge, no one has stepped up to claim this one and it's been 5+ days. I'm on leave next week, so I won't be getting to this before the 4th.

Hi All,

Mining chapter is ready for review (thanks Ron Baxter!), link below. Please have review by Feb 4. Note: I added a few extra review days on this one given it has more complexity than previous chapters.

As a reminder from email Lief sent Nov 19.....

When reviewing the aforementioned chapter, Species Leads will do their utmost to review and edit the document in Sharepoint, so multiple reviewers and the author can still view, edit, comment while establishing and implementing some version control. If you are reviewing the document, but are not or will not be able to do so in Sharepoint, please communicate that with the other leads, author etc, and upload your edited version under a new name(*INITIALS_mm.dd.yy*), so the author and other leads continue to provide comments to the original version.
