Hey Lief,

Maybe just FYI, but attached is a map showing areas at risk of Conifer Encroachment and conservation effort projects from the CED. The conservation efforts are marked in green and they are exaggerated (I made the outline really thick) so they would show up on the map.

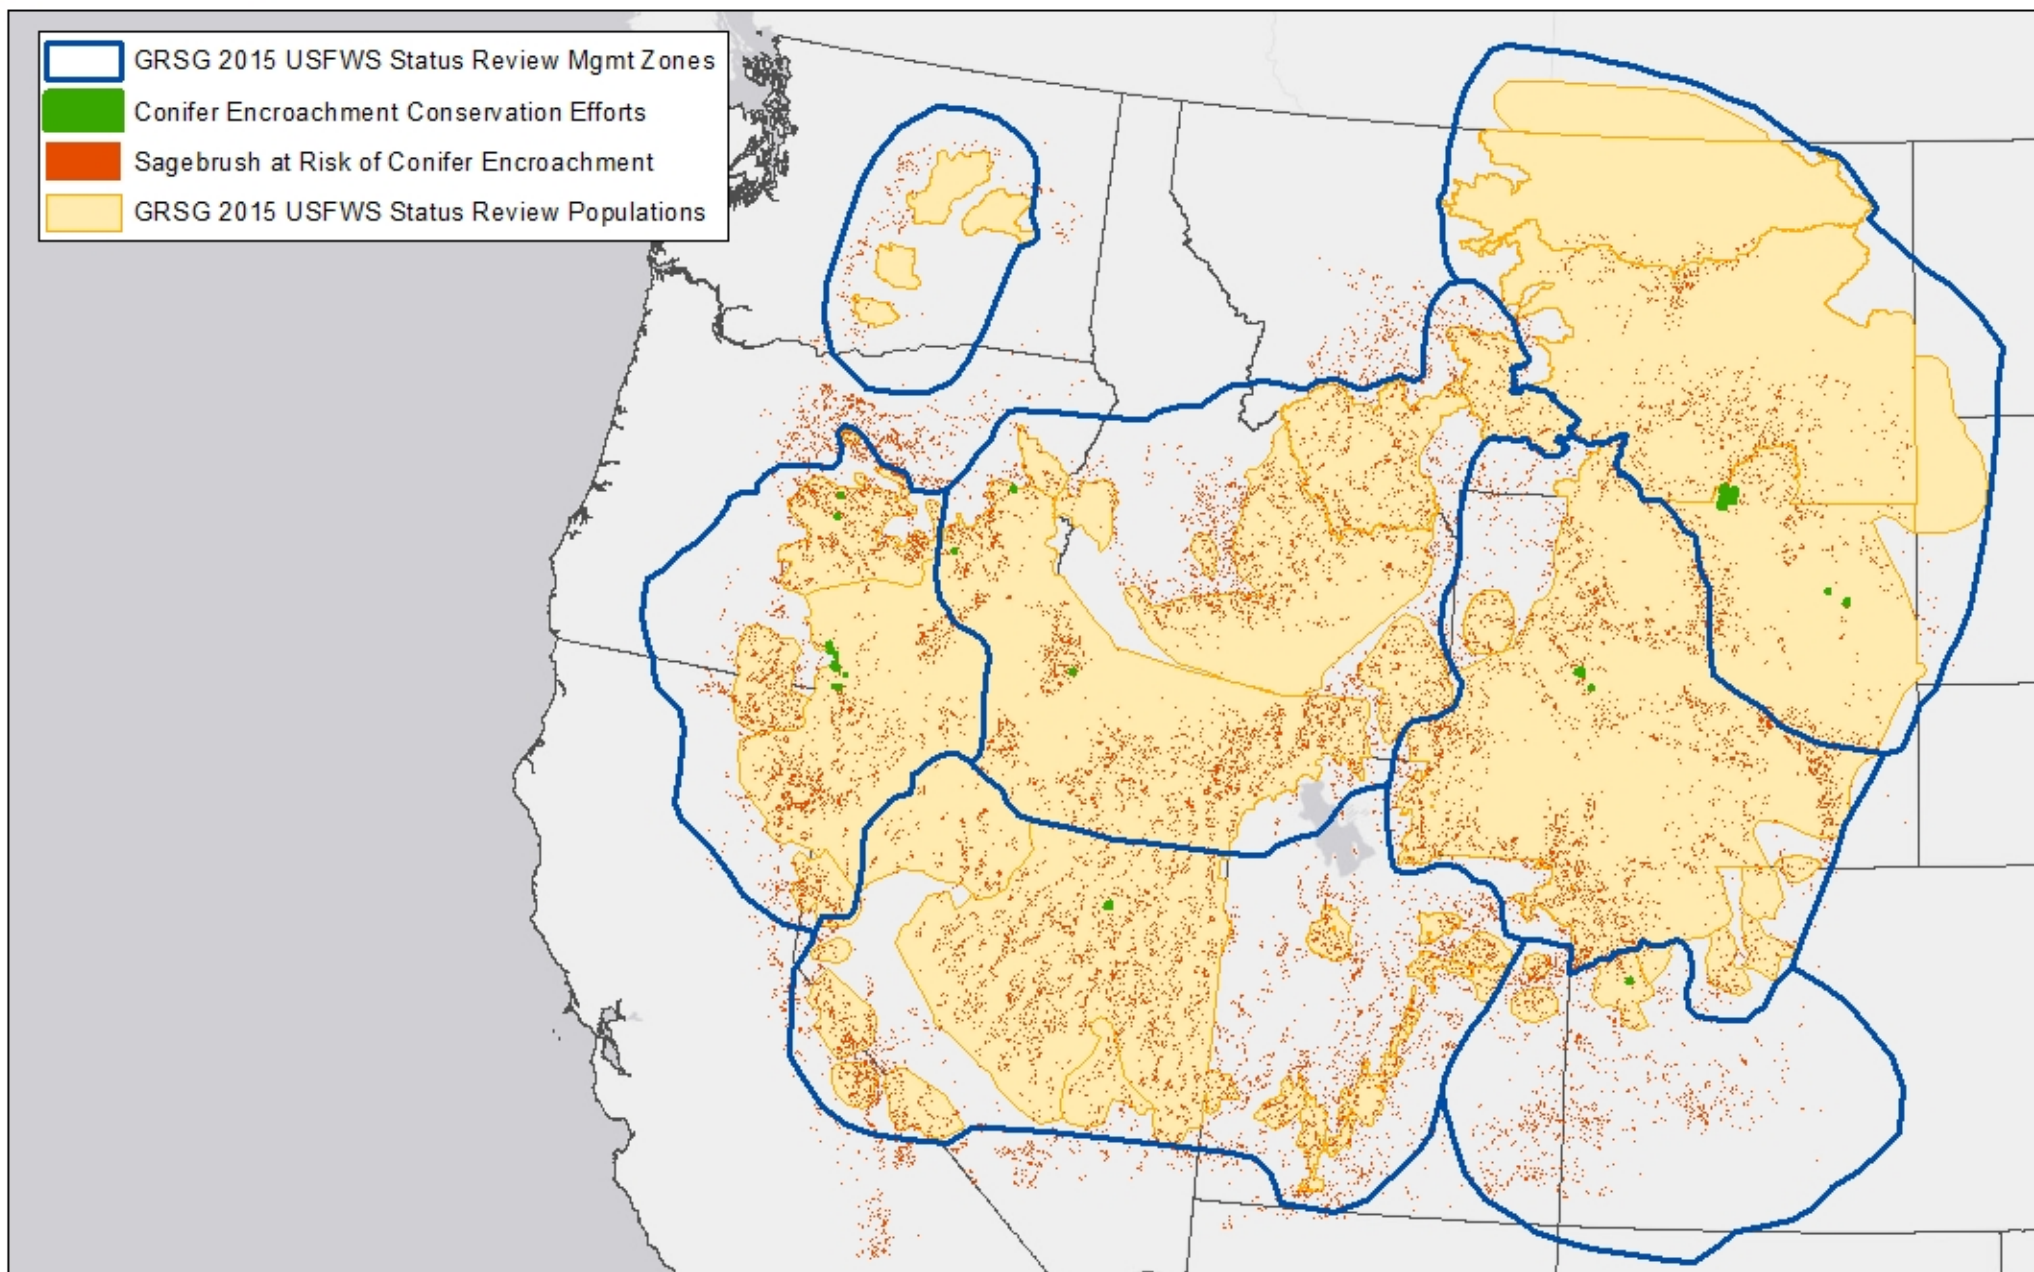

I pulled in all the point data from the CED that related to Conifer Encroachment and were actual projects with acres attached. I buffered the points to create a polygon with the acreage each point represented. As you can see I didn't get a whole lot from the CED. Maybe there will be more coming in or maybe I'm not looking at the data right but I wanted you to know what I have so far. We can discuss more after the New Year.

Jim
