Hi Ed,

I've started working on the Drought chapter for the Species Report, so I thought I'd touch base with you on your current thoughts for the maps related to drought. Drought wasn't part of the COT report, so there's not a map based on that table. When thinking about the current threat, I've been looking at information on the U.S. Drought Monitor (<http://droughtmonitor.unl.edu/>). Do you think that kind of data would make sense to use and overlay on the management zones?

Thanks,
Angela
