---

Hi Ron,

I put doc with my edits on sharepoint, link below. Again, lots of great information, I just reorganized some and added some things from 2010. This was quick and dirty (so if something doesn't make sense don't hesitate to revise what I did) and was not at all a complete review!

Also, I put up a map on sharepoint. It is a spatial representation of the COT report Table 2, i.e. information you mentioned in introduction (I moved the mention to timing and extent section which is also where this map would go).

[20141222 DraftMap GRSGThreat Mining](#)

Please let me know if you have any questions. I'm teleworking today (phone number is on my calendar for today). If I don't hear from you, hopefully I will see you next week!
