Thanks to all for the solid teamwork on this project. It is very important, we are making good progress, and we look forward to completing a quality product.

Happy Holidays

Jeff

Hello FIAT Team members-

The FIAT NGB and SSB Web-Viewer is updated except for a few changes in the Magic (Project Planning Area) PPA and the Big Desert PPA.

Please review the information and comment ASAP. The sooner comments are received the higher the probability comments will be included in the January 15 report. New information may be incorporated directly in Web-Viewer by creating a Project File. Please notify Don Major / Travis Cooper / myself by email that you have entered changes. Web-viewer link below.

EPMSI has been engaged as the Project Writer. The Plan Forward is have a draft report together by Jan 5. If there are information gaps to be filled, we'll request that information on Jan 5 with the deadline of Jan 9 to provide the requested information.

FIAT Core Team members may be asked to provide information before Jan 5.

Thank you for the strong engagement and participation from district/field office specialists and partners. Because of your robust efforts we are producing the best possible product within the allotted timeline.

Best Holiday Wishes - Joe

Joe

Here is the link to the ID FIAT web viewer:

http://ilmidso3gi1.blm.doi.net/SilverlightViewer_2_2/Viewer.html?ViewerConfig=http://ilmidso3gi1.blm.doi.net/Geocortex/Essentials/REST/sites/NGB_FIAT_S2_Boise/viewers/Idaho_FIAT_2014/virtualdirectory/Config/Viewer.xml

We recently completed a fairly extensive clean-up of the Northern Great Basin and Snake/Salmon/Beverhead FIAT Priority Areas. There is one additional update for the SSB Focal Habitat that won't be pushed until early next week (per IT needs) - FYI it covers the addition of some leks between Magic and Big Desert Project Planning Areas.

Cheers, D
