Hi Sara,

If you're around next week, let's find some time to chat. I'm somewhat familiar with your efforts, and we can discuss best methods for delivery and how it would fit into either the CED or our 'general data call'.

Have a nice weekend - I should be in move of next week (cell and office numbers listed below).

**Subject:** grsg data call

Hi Leif,

I understand that you are helping to lead up the data call on conservation efforts for the greater sage-grouse. We have been working to develop a compensatory mitigation program that would promote conservation of the GrSG in Wyoming (related to efforts in Colorado and the crediting system in Nevada). Our effort is still in planning, but I understand that efforts in planning can be included in the data call as a contribution to conservation.

Please let me know what additional information I can provide. We looked at the website for the CED but weren't able to determine how best to submit our information. I understand the data call closes at the end of the year but there may still be a rolling opportunity to be included, so please just let me know what we should be doing, if anything.

This website describes more about our effort:
