---

Sure. I'll work with Jay on it. We are also planning to discuss the original document on our Field Office-Transmission Line conference call this Wednesday. We will be discussing the original and not the updated version, but it might generate some thoughts regardless.

Amy, Jay -

Not sure if you guys are on this email chain from Drue, but there is a revised due date of Sept. 10 which helps if you think you might be able to put some comments together.

Folks,

APLIC told me this morning that they will not have the updated version to us until Thursday.

I've told them that will limit our opportunity to get feedback. They also said that there would be significant changes and additions. Pat and I will meet with them 9/11 and 9/12. If your folks are able to provide comments early on 9/10 that will give us a chance to try and collate Service comments prior to the meeting.

There will be one additional opportunity to comment after the face to face meeting, but it will also be relatively short turn around. I will suggest they give the Service at least 7 business days.

Thanks,

Folks,

APLIC just informed me that they will have a more current draft available for us shortly. The person leading the group thought this was the final going into the meeting, but I guess a member wanted additional changes incorporated prior to the meeting.

Apologies for the inbox confusion.

Project Leaders,

APLIC folks have asked the Service for input on their attached draft transmission line BMPs for sage-grouse habitat. [If you have staff who are able to provide feedback, please ask them to provide it to me by Friday Sept 6th COB.](#) Please ask them to cite page number and issue in a separate document and to provide literature citations for any suggested additions or changes

to the BMPs.

APLIC wants to finalize the BMPs by the end of September. The APLIC group will meet in Denver Sept 11 and 12 to generate a final draft. Pat Deibert and I will represent the Service at the meeting, operating with the feedback we have received from your field staff. I will request that the APLIC group provide the Service with time to review the final draft and anticipate circulating that back out to you for quick review following the meeting.

The Service will not endorse the BMPs, but the BMPs do provide an opportunity for the Service to improve consistency when providing input on transmission line projects across the sage-grouse range. The hope is that by providing input on the development of these BMPs, barring new science, the Service will avoid any future major surprises and have few minor ones that deviate from the BMPs.

Thanks,
