deb haaland and usda wants taxpayer dollars to set up their private hunting club to promote the murder of wildlife for license money, this anti environmental murderous gun club will use general taxpayer dollars, not their own money for their hobby of killign wildlife. they will get general tax dollars from citizens who abhor wildlife murder. when 70% of this nation icitizens are wildlife watchers, how the hell does this nasty obscene proposal come about from deb haaland, appointed by demented biden.

we need to stop this right now. no way should taxpayers pay tax dollars to the us dept of agriculture for murderous assaults on wildlife. we all want wildlife., we know wildlife is part of an environment and these gun happy idiots like pieere of nra needs to be shut down. they always want to use someone body else money for their private murder trips.

soem of the hunters even shot their wives on hunting trips. others brought their wives and had guides to kill animals for them. the entire scene is odious. shut it down. taxpayers shoudl not be payign for this.
