Great news on the invoice! Thanks for passing along the write-up. I also got it from Matt this morning. I have not seen the ranch map either, but was going to see if Andrew has heard anything.

Hope you have a great holiday season, too!  
Trevor

Hi Trevor,

Thank you for your concern — no worries on my end. Administrative hiccups are to be expected, especially with a short-notice consulting gig. NFWF tells me to expect funds deposited on Dec 19, so I can let you know when it comes through.

FYI, Ricketts' folks reached out again yesterday asking for a schematic of the wildlife crossing design they decided to use, as well as a sketch of the “floating rail” idea that Andrew Pettibone came up with. I thought that with all of our discussions and the materials I left with them, they were going to put it together themselves, but they wanted something to give the ranch staff. So I put together a little 2 page PDF that reviewed the specs we discussed in the field. It was cc'd to Matt, and I'm attaching it here. Andrew Pettibone supplied the floating rail sketch on short notice—I'm very grateful for that and for his suggestions. I hope the write-up meets their needs — I did not have a drawing at hand, but used a photo and text description.

I have not seen the map of ranch fences Morgan said he would send around, have you?

Thanks again for the opportunity to work on this—it's been an education! Hope you have lovely holidays.

Cheers,  
Chris
