Hi Morgan, Laura, and All,

I was just made aware of the crossings developed with WGFD and BTNF for the Jackson Fork Ranch that are very similar to the crossing design we came up with for Grizzly Ridge, yet has the possibility of modification with a higher top rail when needed.

<https://wgfd.wyo.gov/Regional-Offices/Pinedale-Region/Pinedale-Region-News/G-F-Partners-with-Ranch-to-Facilitate-Big-Game-Mig>

I hope you'll share this with Mark and staff at Grizzly Ridge.

All best wishes,
Chris

Hello Laura and Morgan,

I've written up and attached the recommended crossing design with specifications, including a "back of the envelope" sketch of the floating rail idea from Andrew Pettibone (USFWS).

I hope it's clear enough to allow the ranch staff to get rolling.

Please don't hesitate to contact me with questions.

All best wishes,
Chris

Hi Christine

Hope all is well! I heard you, Morgan and the rest of the team had a nice visit to the Grizzly Ridge.

The ranch is gearing up to install the various wildlife crossings over the course of this year. Would it be possible for you to send us a "shop drawing", or even a hand sketch delineating the standard 3 pipe crossing detail as well as a second one with the floating middle pipe for the moose crossings.

This can be totally informal, just enough detail for Morgan to give the guys so they may start working.

Let us know if you have any questions
