Very good. Here's a shapefile for the Blackfeet tribal boundary.

Good news! Yes please send your tribal boundary shapefile as I think it would be best to use the one you know.

Thanks!

Morning Linda,

You're very welcome, thank you for the assistance. The screen shot you have of the surrounding area is perfect! That captures everything we need to aid in the communication.

It would also be more helpful if the inset was Glacier county with the Blackfeet tribal boundary rather than the state. If you need the tribal boundary shapefile, let me know.

Thank you,

Andrew,

I really appreciate you taking time to be very specific about what you need, it helps me tremendously.

One thing I haven't asked is how much of the surrounding area you want to see?

Quick screen shot (NOT the map). Would this be enough for the main content of the map? Asking in case you want or need to show more area. I will put in an inset showing where that area is in relation to the the State.

Subject: Re: Grizzly Ridge Bison Ranch Easement

Hi Linda,

We would like to display on a large map, that I would print off of our plotter; an ownership layer for the Grizzly Ridge Ranch, the easement layer, and a layer displaying locations of fence crossings. Ideally we would use this map as a visual to assist with communications to RO leadership, use this map to assist with communication with our local tribal partners, and use this with the ranch managers to identify existing and additional fence crossings. We will meet Thursday Aug 31st and will need the map no later than Wednesday early afternoon.

I'm reaching out for help to make this a professional looking map. I can provide the layers and do a little in Arc, but making "nice" maps is not my forte.

Linda if for any reason you just don't have the time to get this one knocked out by

Wednesday, just let me know and I'll use what I can for Thursday's meeting and take the nice one for later. We know that additional fence crossings will be placed. If it's possible I'd like to have the project file to update this map down the road a year from now or multiple years from now.

I have attached 3 shapefiles. One is the Ranch's ownership layer, one is the easement layer, and the other is the fence crossing layer.

A large portion of the ranch is not under easement, particularly the NW portions of the ranch. I would like to have one map that displays the entire ranch ownership and shows what is under easement (Glacier 62C) and not under easement, but I would also like to have a map that zooms in on just the easement portion so we can mark up on this map where additional fence crossings will be placed.

I'm in and out, but very reachable by cell.

Thank you,

Hi Ben,
Thanks for clarifying at timeline, I will work on this as Andrew and I touched base on this area in an earlier discussion.

Linda

So this isn't related to the high divide CA, it's an easement that we have up along the

Canadian border with a large ranch. It doesn't need to be done tomorrow, but if you could get done next week, that would be great.

Hi Ben!

I'm happy to help but I believe Linda has been tackling the High Divide/MO Headwaters project (which is what I'm guessing this request is for? correct me if this is for something else). How time-sensitive is this request?

Best,
Aubin

Subject: Grizzly Ridge Bison Ranch Easement

Good afternoon ladies,

Could one of you help us out by changing the shading of the Grizzly Ridge Bison Ranch easement on the Realty_assets_aoi layer so it stands out from the other easements? We are trying to get it setup for Matt and Stacy to show that easement individually with the wildlife crossings that have been installed.

Let me know if you can help.

Thanks!
