---

Morning all,

Attached is a zoomed in version of the Grizzly Ridge Bison Ranch (GRBR) map that we received from Realty a couple weeks ago. Linda Moeder in realty shared the project file with me and I am now able to make tweaks to the map as needed. I've zoomed in as much as possible and still display the N/S reaches of the eased portion of the ranch. I'm not a cartographer and this map is very busy and difficult to display everything we are trying to communicate with this product. One must read the legend to begin to decipher this darn thing. If we or Matt need much beyond what's attached, I suggest we go back to Linda Moeder and ask for her assistance.

Also attached is a photo of the ranch's fence crossings that they use in Canada. This Canadian portion of the GRBR is under easement by TNC and TNC has approved the following fence crossing. Photo is attached as "TNC Canada Crossing GRBR". The crossing is 18" bottom and 48" top.

Hope this helps.

Thank you,
