---

Was contacted by Olympic Peninsula Environmental News (a local blog) requesting information related to the proposed commercial aquaculture farm and the withdrawal of our letter. He was following up on comments made by Sierra Club that FWS no longer has any issues with the project. I read a portion of Robyn's letter to him ("we are concerned...") and told him where it and the original 2018 letter (not withdrawn) are located (County website). In case you are interested, here is the link to the blog's reporting on aquaculture <https://olyopen.com/?s=aquaculture>
