What do you mean by survey? If you mean boundary survey, the corners were marked with carsonites in 2008. Are those gone?

If you mean a bird/ biological survey and the corners aren't marked, use these:

North corner 48-10-14.19 123-09-05.71  
East corner 48-10-08.47 123-08-59.15  
South corner 48-09-50.63 123-09-34.05  
West corner 48-09-56.36 123-09-40.62

This is just copied off of the Google Earth screen, remember we sent you that KMZ file years ago? It's probably +/- 10 feet, but I'm assuming that is good enough.

On the other hand, if you need a boundary marked, talk to me, I have to oversee that. Good luck!

We are in the middle of a meeting, trying to set up a survey for the lease area. That's why we are looking for lat/long of the corners.

I think what you mean is Latitude and Longitude? Can you call? I just tried your phone and you didn't pick up, maybe you're in the field?

Dave,

Is there anyway to get GPS coordinates for the corners of the lease represented by the attached survey?

Thanks,  
Jennifer
