Subject: RE: FW: Aquaculture Proposal NWS 2007-1213
Date: Tuesday, December 5, 2017 4:39:08 PM
Importance: High

Ralph,

Thank you for bringing your concern to our attention. Please see the responses to your questions related to Dungeness NWR and the Refuge's role in the permit process in [blue](#) below.

A few questions the Jamestown S'Klallam Tribe would appreciate answered:

-How can the ACOE be reviewing the archeological survey in May 2017 and be waiting for it to be submitted several months later in December 2017?

-How long for the archeological survey to be reviewed? (Please find it attached)

-Am I mistaken to understand that the ACOE is the federal lead on this state-owned aquaculture lease? [It is also our understanding that ACOE is the federal lead on this project.](#)

-Does the Refuge believe they are the lead? [The US Fish and Wildlife Service is not the Federal Lead on the ACOE permitting process for the Jamestown S'Klallam aquaculture project.](#)

-What is the ACOE process for permitting the DNR State-owned aquaculture lease within the managed boundaries of the Dungeness Bay Wildlife Refuge?

-What is the Refuge process for permitting the DNR State-owned aquaculture lease within the managed boundaries of the Dungeness Bay Wildlife Refuge? [We do not have the authority to issue any permits for aquaculture activities within the DNR state-owned aquaculture lease within the boundary of Dungeness National Wildlife Refuge. The Refuge does, however, hold a use easement for refuge purposes. In the past, DNR has provided the Refuge the opportunity to review proposed leases so that the Refuge can confirm that the proposed lease would not be inconsistent with the use easement.](#)

-How does the Refuge's process overlap with the County's? [Washington Maritime NWRC would provide site specific information to the County as needed for them to complete their process, and may provide comment during the SEPA process.](#)

[After all County and Federal permits are received, Washington Maritime NWRC will provide feedback to DNR on any portions of the project that may impact the ability of the Use Easement area to be managed as a Refuge. We will work with DNR to](#)

find identify potential solutions to any issues, as requested.

I hope you find this information helpful.

Jennifer

Hello,

The corps has a complete application for the above referenced. Additional information may be required as we proceed w/ making a permit decision. Should any changes to your proposal occur as a result of state or local review, please provide us updated drawings. The drawings in the administrative record are dated January 26, 2017. Currently, the application is in NHPA 106 review. Thank you.

Subject: [Non-DoD Source] RE: Aquaculture Proposal

Jennifer,

I appreciate you reaching out for an update on our aquaculture proposal in Dungeness Bay. I will defer to Matt Bennett at the Army Corps to let us know how our application is progressing. Once I receive confirmation that we have a complete application from the Corps I will be sending you and the County a copy immediately.

As for our DNR lease visit, I look forward to meeting with Lorenz. We are planning to take our skiff out to the lease, but if weather is poor can we hitch a ATV ride with Lorenz?

Enjoy the record tides next week!

Ralph

Subject: Aquaculture Proposal

Hey Ralph!

We haven't talked in a long time and I was just wondering how your proposal was shaping up. Have you received your Army Corps permit yet? Have you started the Shoreline Permit process? Just trying to get a handle on process timing.

Unfortunately, I won't be able to join you for the site visit in June, but Lorenz will be able to attend.

Hope your spring is going well.

-jennifer
