Thanks for letting us know. I think Sue only had about 9 that she couldn't get her hands on.

Hi Jennifer,

I should have all, or nearly all of the cited documents in electronic format.

However, workload being what it is, and because this consultation was a saga that dragged on for 3+ years, the complete record for this consultation has not yet been compiled.

I have made a note and will remind myself to organize the electronic files ... Will probably burn them to a CD.

Thanks - Ryan -

Hey there Ryan,

In our comments to the County on their DNS for the Jamestown S'Klallam aquaculture Shoreline Permit, we borrowed very heavily from the USFWS BiOp. Would you happen to have the source documentation (e.g., manuscripts, reports, etc) for the references associated with the BiOp? We would like to make sure that we have the docs on file in case they are requested.

If you have them electronically, either a jump drive or uploaded to google docs could work. If they are hard copy, I could come down and make some copies of the referenced pages.

Thanks for all of your help,
Jennifer
