Mary Abrams comments .... they're good and if we can address most of them, we have an even better letter. Good work both of you!

Here are my comments - mostly they are around the continuing need for citing evidence to support claims (even when they are obviously true statements from our perspective).

Here's the redo of the comment letter to ACOE. I believe this letter is clear in that we are not providing comments with a regulatory attitude but as input for consideration to the Corps regulatory process. The "unacceptable level of impact" statement which created such consternation is no longer used. We also used the opportunity to provide a synopsis of the literature and associated citations that back up our concerns as there was some question about the validity of previous comments in that regard. Please let me know if Jennifer has permission to forward the revised comments.

Charlie
