Subject: No Oyster Beds at DNWR
Date: Saturday, October 30, 2021 9:24:14 PM

>

> It is hard to comprehend how US Fish & Wildlife can sanction oyster beds filled with deadly plastic on the pristine and precious Dungeness Refuge. A refuge for wildlife after all... not for commercial gain and the almighty dollar!

> Your agency agrees significant harm will result but does not stop the impending atrocity.

> Please rescind the leases and save this special area for nature to flourish and future generations to enjoy!

>

> Sincerely

> Helen Turner
