Gerry- sorry this is so late. Let me know if you have any questions. Just tried to clarify monitoring mostly.

Joy

Gerry- when do you need comments? I may not get to this until Tuesday or Wednesday? Is that ok?

Subject: For review: Leach's Storm-Petrel restoration proposal

Joy,
As we discussed briefly earlier in the week, attached is a draft proposal for Leach's storm-petrel restoration on the Farallones. This proposal was requested by Mike Szumski at R1

ES in Oregon as part of an oil spill restoration plan they are working on. Mike looked at an earlier draft which I revised based on his comments. This proposal used the Large Invasives as a template, then was revised to tailor it to the Leach's storm-petrel situation. Leach's are listed as a species likely to benefit from the mouse eradication. Pete Warzybok helped me put together the Leach's data.

Matt suggested you give this a review before I re-submit. If you can find some time by next week to review, that would be great. Thanks for your help and let me know if you'd like to discuss.
