Matt and Barbara,

Pt Blue provided me with a draft summary of their updated, preliminary ashy storm-petrel population index analyses. I have reviewed and made some suggested edits and comments. I would like to get comments back to them by Monday, so if you would like to review, I have shared it in the attached link. We should all be able to edit the version shared here. If you can't, then just download and edit your own version.

Please note that there are 2 versions of the figure presented. The first shows just the trend with confidence interval. The second shows the trend but with the individual year capture rates plotted as well. I provided a comment with my suggestion but let me know if you have a preference.

Thanks. I'm signing off the weekend. Happy Thanksgiving!

Gerry McChesney
