---

I met with Sonce deVries and Damien Higgins today regarding the project. Sonce has offered to work with EPA to get them to provide advice in a more helpful manner. I suggested that you both be included in those discussions, and to perhaps include Karen V's supervisor. Sonce has also offered to help you identify other sources of rodenticide/invasives control information -- contacts who worked on other eradication projects who might give you an independent objective view -- so that you have more than just Island Conservation's opinion about alternatives. Call me if you'd like more information.
