Hi Gerry,

Following up from our last phone conversation, attached is the SOW and itemized budget for the 2010 planned eradication work. I provided some justification for why the costs are high, which mostly relates to delays with the EA. Please review the language and let me know if you have any suggested edits or changes.

Additionally attached is a copy of the Cooperative Agreement that was drafted between FWS and IC for the San Nicolas project. This may provide a good template for arranging fund transfer to Island Conservation. Please let me know how I can assist moving this agreement forward with your Refuge.

I believe our next step should be to complete the 2010 budget for submission to Lukenbach. At some point you, Brad, and I should coordinate (perhaps also with PRBO?) to discuss additional costs in the 2010 budget, as well as conversations about the full implementation budget. I have likewise drafted a revised implementation budget to account for project changes and cost increase since the initial 2006 budget draft. When you are ready, I can send this to you and we can discuss further.

Would you be available to talk sometime before Thursday next week? I am headed into the field for 3 weeks therefore the time I would be available in early May. Please suggest a date/ that would be most convenient for you.

Thanks,

Stacey
