Subject: FY 2013 Large Invasive Species Project recommendations
Date: 07/11/2012 12:57 PM

Hello Everyone,

Thank you for responding to the FY 2013 Request for Proposals for the NWRS Invasive Species Large Project Allocation and for your patience with the process. The review committee and the Refuge Chiefs plan to move forward with the following recommendations listed in order of priority. Receipt of funding is contingent on completion of NEPA requirements and the FY 2013 NWRS budget allocation. Only one of these three projects will be funded in FY2013.

1. Eradication of Feral Horses and Burros from Sheldon National Wildlife Refuge to Restore Function and Integrity of Sensitive Habitats for Sagebrush-Steppe Species (\$1,000,000)
2. Farallon National Wildlife Refuge Invasive Mongoose Eradication Project (\$984,667)
3. Ungulate Eradication within Fenced Management Units at Hakalau Forest National Wildlife Refuge (\$1,000,000)

If you have questions please feel free to contact me.

Thanks.

Jenny Ericson
