I noticed all the sand blown about and immediately thought of the displacement of it. I'm sure there will be impacts to the flats.

I wonder how the birds faired?

SpaceX has initiated the anomaly response plan to address the debris from this launch. As soon as the area is safe to enter, I expect to tour the site to assess post-launch impacts. I don't expect debris from the ship/booster since it was aborted off the coast but the launch itself expelled lots of debris and started a grass fire. Camera equipment and vehicles left across the highway were significantly damaged and pieces strewn about. Concrete pieces and debris from the pad also seem to have been cast out.

Hi, all,

Just checking in to see how this morning's launch treated you all and the Refuge...

Joan
